About The Program and Services

Message from the Program Director

The joint training community is dependent on Joint Knowledge Online (JKO)! We are delivering profound mission impact. JKO is dramatically transforming the way individuals prepare for joint military operations and joint training exercises. We are enriching the joint training enterprise with improved quality of joint training curriculum, the increase of joint content, and cost-effective availability to globally dispersed users. Service men and women are accessing JKO from around the world to take required training at their convenience and at their own pace. Corresponding with JKO's exponential growth, usage of distance learning is steadily growing as a valued venue and "force multiplier" for military joint training as greater numbers of individuals are receiving training prior to arriving in theater for operations.

As we move forward, we continue to roll out new courses and tailored curricula to meet our stakeholders' training requirements, continue tailoring functional enhancements, and continue sending out training teams to further tailor JKO to combatant commander training and training management needs. In addition, this year we are fielding advanced learning technologies specifically targeting identified joint training gaps. Our Virtual Cultural Awareness Trainer (VCAT) and Small Group Scenario Trainer (SGST) applications will roll out later this year providing web-based gaming simulation capability for joint individuals and small groups immersed in multiple areas of operational responsibility, for multiple mission sets, and multiple scenarios. VCAT is a first person "game" that incorporates story telling scenario introductions, real time remediation, intelligent tutoring, advanced sequencing, learning content navigation and use of avatars for the purpose of stimulating critical thinking and learning. SGST uses similar learning technologies to provide a web-based training capability for training Joint Task Force individuals, and Board, Bureau, Center, and Cell (B2C2) small groups and collaborative small group scenarios-based battle staff training.

We also continue making ground breaking progress in advancing collaborative relationships with our US agency partners for courseware development collaboration of interagency relevant training supporting "whole of government" and "comprehensive approach" training. JKO hosts operationally relevant courses necessary to conduct joint operations, security cooperation, disaster response, and humanitarian relief operations.

Delivery of cost effective, relevant training that effectively prepares individuals for joint operations is transformational and invaluable to the enterprise – with stakeholders actively engaged in shaping the joint training capability to meet their operational needs.

Mr. Joe Camacho
Joint Knowledge Development and
Distribution Capability
Program Director

About The Program and Services

Joint Knowledge Development and Distribution Capability

The Joint Knowledge Development and Distribution Capability (JKDDC) is the DoD Training Transformation (T2) program responsible for delivering individual joint training capability. JKDDC works collaboratively with stakeholders to provide operationally relevant training content supporting the "whole of government" and "comprehensive approach" training necessary to conduct joint operations, security cooperation, disaster response, and humanitarian relief operations. JKDDC stakeholders are the combatant commands, Services, combat support agencies, multinational, and interagency community partners.

> **JKDDC VISION:** To be the premier enabler for the provision of relevant, timely, and globally-accessible joint knowledge, preparing and assisting individuals to support combatant commands and integrated operations—anytime, anywhere.

Joint Knowledge Online

Joint Knowledge Online – JKO – is the JKDDC tool for delivering individual joint training capability. JKO is an enterprise portal system providing access to web-based courses and learning tools that support joint training for individuals deploying to areas of joint operations or collective joint training exercises.

JKO integrates with other DoD systems and uses the latest advanced distributed learning technologies to provide conveniently accessible, self-paced, pre-deployment training curricula. JKO delivers access to a learning management system and training support resources via three networks: military unclassified NIPRnet (http://jko.jfcom.mil) and classified networks SIPRnet (http://jko.jwfc.jfcom.smil.mil), as well as the Internet Public network (http://jko.cmil.org). JKO provides an effective and convenient online training opportunity for individuals to prepare in advance for collective training exercises and integrated operations.

About The Program and Services

Joint Knowledge Online Learning Management System

All three JKO portal channels provide access to the JKDDC tailored Learning Management System (LMS) for managing delivery of self-paced, web-based training, including the tracking, documenting, and reporting of student progress. Course status and completions are recorded in the LMS so that students can track their training progress. The LMS integrates with the Army Training Requirements and Resources System (ATRRS) for DoD-wide joint training recording and reporting. Each instantiation of the LMS is customized to the particular network. The LMS on NIPRnet provides access to all JKDDC courses with the exception of classified material. The LMS on SIPRnet provides all courses found on NIPRnet with the addition of classified courses and material. The LMS via Internet Public provides access to unclassified, non-FOUO courses that are relevant to joint, integrated operations.

The purpose of the courseware catalog is to provide our user community with a reference guide to the nearly 300 joint and multinational courses, supplementary presentations, and instructional resource links available via the JKO portal network system.

The taxonomy of JKO course listings is as follows:

Course Name — Joint Functional Area — Level of War — Origin of Course — Course Number — Course Module — JKO Network Availability

Joint Planning Orientation Course (JPOC) J5OP-US002-02 N/S/IP

Joint Functional Area
J1: Joint Personnel
J2: Joint Intelligence
J3: Joint Operations
J4: Joint Logistics
J5: Joint Plans
J6: Joint Communications
J7: Joint Training
J8: Joint Integration Level Information
J9: Joint Experimentation

Levels of War
TA: Tactical Level Information
OP: Operational Level Information
SN: Strategic National Level Information
ST: Strategic Theater Level Information

Origin of Course
US: US Course
MN: Multinational Course
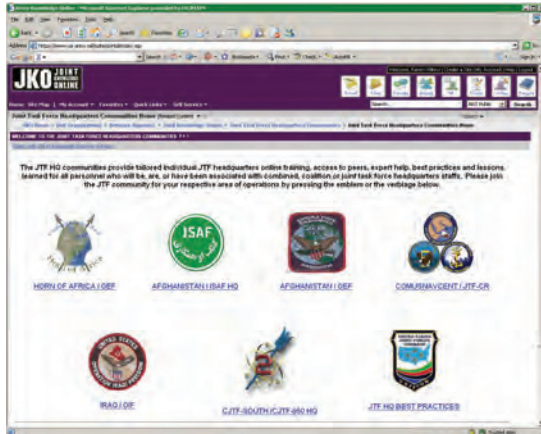

Course Numbering-Course Module
001-02: Course Number-Module Number

JKO Network Availability
N – NIPRnet (http://jko.jfcom.mil)
S – SIPRnet (http://jko.jwfc.jfcom.smil.mil)
IP – Internet Public (http://jko.cmil.org)

About The Program and Services

Communities of Interest

JTF HQ COI on JKO-N

Regional Cooperation Exercise 08 COI on JKO-IP

JKO facilitates interactivity with content, peer, and subject matter experts by the organization of Communities of Interest (COI). JKDDC establishes topical COIs for joint communities in response to stakeholder requests, then organizes and delivers training programs, such as the Joint Individual Augmentee Training (JIAT) Program and exercise training, within a COI on JKO. A Community of Interest provides a forum for practitioners of a discipline to interact and share knowledge and experiences pertinent to their tasks at hand, akin to a tailored web-based individual toolkit. Communities provide a method for individuals to keep each other current in the developments of a shared discipline and assist with better top-down communication by providing multiple direct methods of sharing information and ideas.

The Joint Task Force Headquarters (JTF HQ) Training Community is a prominent community on JKO. The JIAT Program within this COI was designed to prepare Individual Augmentees (IAs) for JTF HQ assignment using online training instead of residential training, thus saving training funds and ensuring better trained IAs. The JTF HQ communities on JKO provides tailored individual JTF headquarters online training, access to peers, expert help, best practices, and lessons learned for all personnel who will be, are, or have been associated with combined, coalition, or joint task force headquarters staffs. JKDDC tailored the originally "generic" IA training to Areas of Operation specific training – specifically for Horn of Africa, Afghanistan, and Iraq pre-deployment training.

Stakeholders may initiate a COI using the procedures for submitting Request for Service (RFS) under the Administrative Information section of this catalog.

About The Program and Services

What's New…

New Catalog Layout! The JKDDC program is always at work to enhance the access to and use of the JKO portals and joint training resources we provide. Our courseware and capabilities catalog is undergoing iterative redesign to improve its usability. In this issue we are updating and repositioning program and introductory information, as well as adding alternative course listing approaches. The next issue will reflect further improvements including new course descriptions and listing approaches, making it easier for our users to quickly find the right resources to meet their training needs.

Joint Officer Management and Joint Qualification Officer Points! We have identified the Joint Officer Management Joint Qualification Officer (JQO) points associated with courses available on JKO. Where applicable, JQO points earned with course completion will be identified in the course listing after the title. The qualification points earned will be captured by the JKO LMS and integrated with the training completion records automatically reported to ATTRS. The JQO points are awarded on a basis of 1.0 point per 40 hours of training. For example, completion of a 20 hour joint certified distributed learning course is awarded 0.5 JQO points.

Tailored Curriculum! One of our most significant concerns is that joint training content is operationally relevant. The JKDDC program employs Joint Courseware Facilitators (JCF) specifically to enhance near-term operational relevance for courseware development by working with U.S. Joint Forces Command's Joint Training Operations Group. JCFs coordinate directly with Deployable Training Team Observer/Trainers to convert Mission Rehearsal Exercise (MRX) academics and functional training to online courseware utilizing tools that facilitate converting briefings and instructor notes into web-based modules compatible with JKO's learning management system.

We continually update the Joint Individual Augmentee Training (JIAT) curriculum with Area of Responsibility specifically tailored content. Tailored COIs for CJTF-HOA, IRAQ, Afghanistan, and ISAF include academics and other HQ staff-directed training and information. It also includes MRX functional training and short scenarios based on selected items from the MRX Master Scenario Event List. Finally, it includes discussion forums to reinforce and expand upon course content. The intent is to replicate as much of the training provided to core staff members during an MRX as is feasible online.

International/US Government Interagency Access to JKO NIPRnet! Canadian, British, and Australian military members as well as US Government interagency personnel may now access the vast and expanding training resources available on the JKO NIPRnet.

About The Program and Services

What's Coming…

The JKDDC program is continuously developing new courseware and building communities of interest. The courses and communities listed below are in work and will be available on JKO soon!

Courses

- Airspace Command and Control (AC2) in the Joint Interagency Intergovernmental and Multinational (JIIM) Environment Course
- Advising Foreign Security Forces 101Course
- Civil-Military Coordination during Humanitarian Aid Disaster Relief Operations Course
- Commander's Decision Cycle Course
- Introduction to Interagency Support for Reconstruction & Stabilization Operations Course
- Introduction to JKO LMS Course Manager Role Course
- Introduction to JKO LMS Reports Manager Role Course
- Introduction to JKO LMS Student Role Course
- Introduction to JKO LMS Training Coordinator Role Course
- Introduction to Operational Contract Support, Commander & Staff Course
- SSGN-Joint Special Operations Task Force Training Course
- Weapons of Mass Destruction Command, Control, & Coordination Course

Administrative Information

Military Network Login/Registration Instructions – JKO-NIPR and JKO-SIPR

JKO-NIPR and JKO-SIPR are accessible by military Service personnel and individuals with DKO/AKO NIPR and SIPR accounts, respectively. If you already have a DKO/AKO NIPR and/or SIPR account, go directly to JKO and login using your Common Access Card (CAC) or user name and password. If you do not have a DKO/AKO account, follow the steps below to set up your account(s).

JKO-NIPR

1. Go to http://jko.jfcom.mil and click "New User"
2. All new users must first register for an account via DKO/AKO. Click "Joint Account" and follow instructions for establishing an account. (NOTE: DoD/Service contractors must select "Sponsored Account" and use "joint.training" as your Army sponsor.)
3. Complete the account registration form being sure to provide your correct email address and social security number to expedite account approval.
4. You will receive two email notifications: 1) confirming sponsor approval and 2) confirming account setup. Once account is established go to http://jko.jfcom.mil, and click "Enter JKO"
5. You will be redirected to DKO/AKO. Follow login instructions and you will be redirected to JKO Home page.

JKO-SIPR

1. Go to http://jko.jwfc.jfcom.smil.mil and select "Click here to enter JKO". You will be directed to DKO/AKO SIPR login page.
2. Under "New User" click on "Register for DKO-S".
3. Select "Create Joint Account" and complete form to obtain an account. Be sure to provide an external email address and social security number to expedite account approval.
4. You will receive 2 email notifications; 1) first indicating sponsor approval of the account and 2) second indicating DKO/AKO SIPR approval. Accounts become active with notification of DKO/AKO SIPR approval. Once your account is setup, follow instructions for login through DKO/AKO or go to http://jko.jwfc.jfcom.smil.mil and select "Click here to enter JKO".
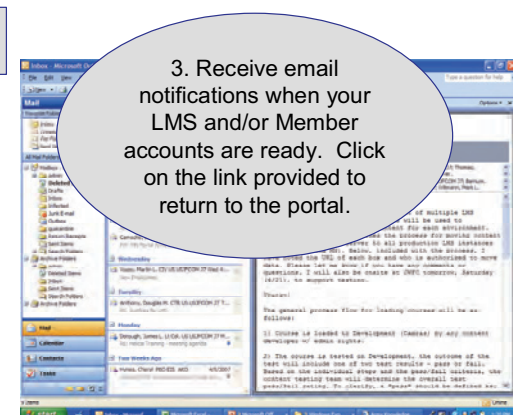

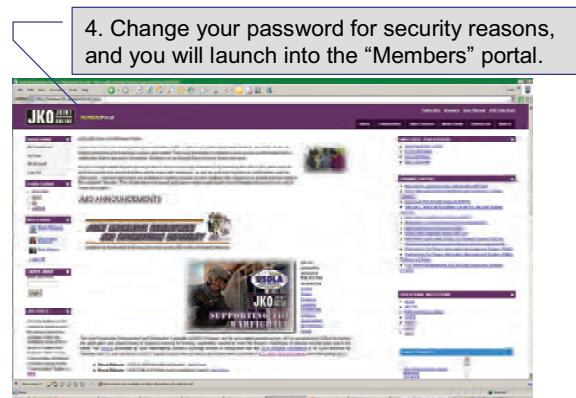

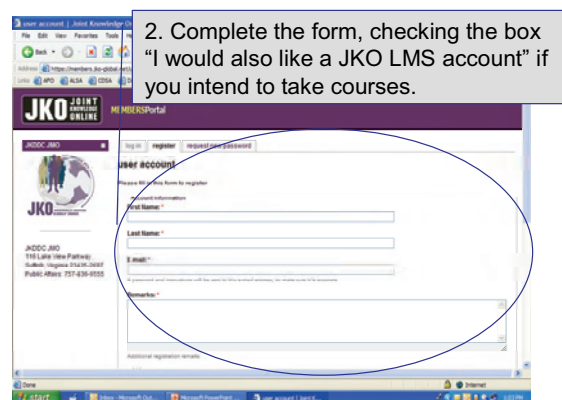

Administrative Information

Public Network Login/Registration Instructions – JKO-IP

JKO for public access is launched by entering http://jko.cmil.org from your Internet browser. Links to military, multinational, interagency, and intergovernmental information resources are immediately available on the home page. To access online training courses you will need to first set up an LMS account (see LMS Account Registration Procedures).

To access Communities of Interest (COI's) and other editing features, you will need to register for a Members Portal account. The following steps describe the process for obtaining a members account to the areas of the portal beyond the home page:

1. Go to http://jko.cmil.org.
2. From the JKO-IP home page click on "Become a Member" located under "Members Portal" in the upper left corner of the page. Fill out the form that appears and ensure that your email address is correct. NOTE: We recommend checking the box "I would also like a JKO LMS account" if you would like to create a JKO-IP LMS student account at the same time. You will receive an email notification when your JKO-IP LMS student account is established.
3. When your members account is established, you will receive an email confirmation with an attached link. Click on the link, which will bring you back to our portal. You will be asked to change your password for security reasons. Once you change your password, you will launch into the Members Portal.
4. Inside the Members Portal, you will see that the tabbed menu selections on the top right have expanded to include a "Communities" tab (our COI's).

1. Go to http://jko.cmil.org and click on "Become a Member"

2. Complete the form, checking the box "I would also like a JKO LMS account" if you intend to take courses.

4. Change your password for security reasons, and you will launch into the "Members" portal.

3. Receive email notifications when your LMS and/or Member accounts are ready. Click on the link provided to return to the portal.

Administrative Information

LMS Account Registration Procedures

To access the LMS via JKO-IP and JKO-SIPR requires a separate account registration because single sign-on has not yet been integrated for these two networks. To register for a course first requires registration for an LMS account. For convenience, setting up your LMS account is an automatically approved, self-registration process. Follow the steps below to establish an LMS account.

1. Go to http://jko.cmil.org and click on "Take Courses"

2. Click on "Register for an LMS Account" and complete the form.

3. After submitting the form, click on "Continue" and begin taking courses. Your account information will be emailed to you.

4. Browse courses by selecting the "Joint Courses", "CoComCSA Courses" or "Curriculums" links. Select and enroll in a course

NOTE: In the diagram above, the only difference in procedures for JKO SIPR is in Step 1. Go to http://jkolms.jfcom.smil.mil and click on "Take Courses."

Administrative Information

Submitting a Request for Service

JKDDC develops joint training products and services in response to JKDDC stakeholder requirements and delivers global access to its JKO Portal system. This provides access to web-based courses and learning tools to personnel preparing in advance for joint training exercises and integrated operations. JKDDC is a service organization providing content development and online hosting in response to validated, prioritized training requirements. JKDDC stakeholder requirements are submitted and managed via the Joint Investment Database (JIDB). The form used within the JIDB for requirement submission is called a Request for Service (RFS).

The JIDB is the auditable, automated management system for managing stakeholder requirements and budget control. The JKDDC JIDB integrates with the Joint Warfighting Center's (JWFC) JIDB to provide a closed loop, automated system to collect stakeholder requirements as they are submitted and to maintain configuration control of requirement submissions as they are processed through the Joint Management Office for resource allocation and execution.

The JKDDC Program Director e-mailed the stakeholders requesting identification of up to 3 designated submitters for the JIDB. Stakeholders may designate and unlimited number of drafters who forward their input through one of the designated submitters. Submitters and drafters alike follow the procedures below.

To access the JWFC JIDB you need a JFCOM account (this is **NOT** a JKO/DKO account). There are two types of JFCOM accounts:

- A JFCOM network account, used by internal JFCOM personnel.

- A JFCOM **Webgate** account, used by external Stakeholders.

1. To request a JFCOM Webgate account, use the following URL:
https://www-secure.jwfc.jfcom.mil/login/wgRequest.jsp

2. Fill in all of the fields circled in green, using the POC information as indicated, and submit. You will be notified via email when your Webgate account has been created.

3. Log on to the JIDB application using the following URL:

https://www-secure.jwfc.jfcom.mil/jam/jam.jsp

4. The first time you log on to the JIDB you will be prompted to enter the profile information shown in the screen capture below. Your user name will be added to the JKDDC JIDB module, but you will have to establish your JKDDC JIDB role as a request submitter in order to establish access within the JKDDC JIDB module.

5. To establish your role as an RFS submitter, send an email to Neil Rish at neil.rish.CTR@jfcom.mil. If your role is to draft requirements for submission, contact your organization's JIDB representative (the person with the JKDDC JIDB Submitter role) for access to the JKDDC JIDB module.

Courses and Information Resources

Course/Presentation List by Topic

This section lists courses and presentations by functional areas for ease of selection. New courses are identified by *"NEW"* following the course title. Courses resulting in Joint Qualification Officer Points are identified by *"(JQO=#.#)"*, at the end of the title. The course or presentation number, including the portal(s) that it resides on, appears to the left of each title. The portals are identified as follows: N – NIPRnet, S – SIPRnet, and IP – Internet Public. Course descriptions and details are found on the associated page, in the next section of the catalog.

Course/Presentation Details by Number

J1OP-MN067 Law of Armed Conflict Course N/S/IP
An armed conflict arises when elements of opposing armed forces are intentionally engaged in military operations against each other or when targets in territory or territorial waters of another state are intentionally attacked.
This course, developed by the Turkish General Staff PfP Training Center (Ankara-Turkey), provides military or civilian personnel an appropriate balance of academic and practical knowledge in the principal areas of international law relating to the Law of Armed Conflict (LOAC) and to enable participants to acquire ability and knowledge within the broad field of LOAC. The course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS) and is offered here for informational purposes only, without accreditation or instructor interaction. Online, 20 hours

J1OP-MN071 Introduction to Medical Intelligence Course N/S/IP
Medical Intelligence training is aimed at staff personnel or those assigned into future billets as NATO medical staff officers on strategic, operational or tactical level. It provides a basic MEDINT foundation that you will need in your job, and is designed to prepare you for more in-depth training (Medical Intelligence course # N9-87) at the NATO School Oberammergau (NSO). Online, 2 hours

J1OP-US132 Legal Authorities and Limitations Required in Support of JFHQ-JTF State Operations Course N/S/IP
The purpose of this course is to aid National Guard, Reserve, Air National Guard officers and senior Non-Commissioned Officers (NCOs) serving on Joint Assignments. Graduates will understand the intent of the Commander in a Joint organization and environment. All content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. It is focused at the operational level of war, and specifically directed toward those officers selected to attend Joint Staff training and perform duties as JTF, Combatant, or Component Staff Planner. Online, 2 hours

J1OP-US175 STRATCOM Basic Mission Area Training (BMAT) Course S
The BMAT Course provides the rapid assimilation of newcomers to USSTRATCOM. It provides key information to each of the commands Unified Command Plan (UCP) assigned missions and related functions. Online, 8 hours

J1SN-MN043 Introduction to Human Rights Course N/S/IP
This course concentrates on "human rights in our contemporary society." Its primary purpose is to interpret contemporary human rights law and its effect upon the individual, the Nation State, and the international community. The course content provider is the George C. Marshall European Center for Security Studies. This web-based course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). Since this course is offered here for informational purposes only, without accreditation or instructor interaction, it is not necessary to prepare/submit the Human Rights Action Plan at the end of the course. Online, 10 hours

J1ST-MN041 Introduction to International Humanitarian Law Course N/S/IP
This course assesses the affect of international humanitarian law on military operations, and introduces participants to the legal and international humanitarian law issues involved in military operations. The course content provider is the George C. Marshall European Center for Security Studies. This web-based course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). It is offered here for informational purposes only, without accreditation or instructor interaction. Online, 10 hours

Courses and Information Resources

J2OP-US013-01 Joint Task Force Fundamentals Course (JTF 101) Module 1: The Operational Environment N/S
This module Operational Environment presents basic background information on the operational environment in which a joint task force (JTF) conducts operations. It also includes fundamentals of joint operations, the focus of a JTF within this environment, and the initial challenges of executing JTF missions at the operational level. Online, 2 hours

J2OP-US013-13 Joint Task Force Fundamentals Course (JTF 101) Module 13: Joint Intelligence N/S
Joint Intelligence module presents fundamentals of the joint intelligence organization, systems, and considerations to a joint force commander (JFC) and staff. The module examines joint intelligence roles and responsibilities, joint intelligence preparation of the operational environment, and the intelligence process architecture used in joint task force (JTF) staff planning and operations. Online, 2 hours

J3OP-US149 Conduct Mission Analysis in Support of JFHQ-JTF State Operations Course N/S/IP
The purpose of this course is to provide direction to officers selected to attend Joint Staff training, and perform duties as JTF Combatant or Component Staff Planner. It is focused at the operational level of war, but includes aspects of tactical Unmanned Aerial Systems (UAS) use. After completing this course, graduates should be able to conduct a mission analysis, and operate effectively in joint organizations in both domestic and overseas contingency environments. All content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Online, 1 hour

J3OP-MN036 Defence Against Suicide Bombing Course N/S/IP
The Defence Against Suicide Bombing course was planned to inform about the most acute and serious threat, 'suicide bombing.' The course is developed in the Centre of Excellence - Defence Against Terrorism (COE-DAT), Ankara/Turkey and is provided for the purpose of keeping North Atlantic Treaty Organization (NATO) personnel informed about suicide bombing attacks.
The opinions and the comments expressed in this course are those of lecturers and do not necessarily reflect the official policy of COE-DAT, the Turkish General Staff of Republic of Turkey, or NATO. Online, 25 hours

J3OP-MN040 Conflict Management and Negotiation Course N/S/IP
This course illustrates various ways in which concepts can be applied by practitioners in the field; provides theories of violent conflict; catalogues current communal conflicts in the world; addresses issues and available tools of crisis intervention; and addresses international negotiations and post-conflict peace building. The course content provider is the Inter-American Defence College. This web-based course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). It is offered here for informational purposes only, without accreditation or instructor interaction. Online, 20 hours

J3OP-MN060 Operations in the Information Age Course N/S/IP
This course is adapted from a graduate level course focused on Information Operations offered at the Naval Postgraduate School in the US. Faculty members at the Naval Postgraduate School modified the content with the assistance of students from Bulgaria, the Ukraine and Turkey. The CISO Academic Team and the CISO Technical Teams completed the course design. Peer review was accomplished with participation from the NATO School in Oberammergau and the Bulgarian National Defence Academy. This course is intended to help you perform better as a staff officer in support of coalition military operations in today's high technology military environment. Coalition operations are expected to be the norm for both NATO and Partnership for Peace member states for the foreseeable future. Online, 2 hours

Courses and Information Resources

J3OP-MN061 Security in the Information Age Course N/S/IP
This course provides an introduction to the main risks and emerging insecurities of the information age, which is characterized by the rapid spread of information and communications technology (ICT) and new kinds of vulnerabilities as a consequence of the dependence on ICT in modern-day societies. The six learning objects include an overview of the information revolution and how it is changing the risk environment, a description of malicious actors and the tools that they can employ to cause damage in the world of information infrastructures, an introduction to the research field of security studies in connection with information-age risks, a discussion of the use of ICT in violent and non-violent conflict situations, an outline of critical information infrastructure protection (CIIP) policies, and a discussion of multilateral endeavors to protect cyberspace. Online, 3 hours

J3OP-MN062 The Revolution in Military Affairs Course N/S/IP
This module is intended to provide background and conceptual information on establishing a Revolution in Military Affairs (RMA) curriculum. At the conclusion of this module, you will be able to discuss the following topics: 1. History; 2. Three Core Categories; 3. Current RMA; 4. Art of the Possible; and 5. Strategic Divergence. Online, 1 hour

J3OP-MN066 Ethnic Conflict and Peace Operations Course N/S/IP
This course focuses on the evolution in the nature of future conflict, with particular emphasis on ethnic conflict and inter-communal violence. The course content provider is the George C. Marshall European Center for Security Studies. This web-based course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). It is offered here for informational purposes only, without accreditation or instructor interaction. Online, 2 hours

J3OP-MN070 Introduction to Maritime Operations Course N/S/IP
This course provides an overview of Introduction to NATO Maritime Operations. It is organized into units, each one covering a separate topic and area, with a fifth unit that provides you with the setup information for the Zoran Sea Exercise. At the conclusion of this course you will be able to discuss: 1. Naval Operations and Concepts; 2. Maritime Command and Control; 3. Naval Warfare Focus Areas; 4. NATO Maritime Operations; and 5. Zoran Sea Exercise. Online, 4 hours

J3OP-MN072 Introduction to NATO Public Information Course N/S/IP
This Online, course introduces you to public information work in NATO, its organizational structures and responsibilities. It also discusses the political guidance for news media in NATO-led operations.
At the conclusion of this course you will be able to:
1   Identify the four phases of the Public Information Work Cycle.
2   Discuss the principles of NATO's political guidance for public information work.
3   Describe Public Information office structures and the responsibilities of each organization to manage public information.
4   Explain the principles of basic journalism.
5   Discuss how to release information to the public through news media.
6   Describe the roles and structure of the Press Information Centre (PIC).
7   Explain how to work with media in operations, specifically in preparing for press conferences and interviews.
Online, 2 hours

J3OP-MN076 The Combined Joint Task Force Course N/S/IP
This course provides operational concepts for the formation, structure and implementation of CJTF principles. Upon completion of this module, you will be able to discuss the following topics: 1. NATO Command Structure; 2. NATO Force Structure; 3. CJTF Concept and Evolution; 4. CJTF Concept; 5. NRF Concept; 6. Deployed Forces; 7. CJTF C2 Structure; 8. Executing a CJTF; 9. CJTF Scenario Example; and 10. CJTF Implementation Status. Online, 3 hours

J3OP-MN088 Improvised Explosive Device Awareness Course N/S/IP
This course provides an introduction to Improvised Explosive Devices (IED), including their role in warfare. It also provides an introduction to the types of IEDs, the enemy's tactics for each, and counter techniques. Additionally, it provides an introduction to the Patrol Leader's and Explosive Ordinance Disposal's (EOD's) security and responsibilities, what to prepare for EOD's arrival, and steps to take after the area has been declared clear. Online, 2 hours

J3OP-MN089 Crowd and Riot Control Course N/S/IP
This course was designed to help you learn the standards and create awareness regarding Crowd and Riot Control (CRC). It is designed for students at the tactical and operational levels to learn background information about CRC, how to control a crowd and riot, the legal aspects of CRC, and the lessons learned during different crowd and riot control situations. Online, 3 hours

J3OP-MN091 Combined Joint Task Force Training Modules N/S/IP
The purpose of the Combined Joint Task Force (CJTF) Training Modules is to introduce NATO Staff Officers to the operational concepts of a CJTF and a CJTF Headquarters. The operational roles of the Commander, Deputy Commander, Chief of Staff, Intelligence, Operations, Logistics, and Planning Officers are described. Online, 2 hours

J3OP-MN172 Conflict Management and Negotiation (v.2) Spanish Course N/S/IP
This course is an eleven unit, self-study introduction to International Conflict Management and Negotiation. Combining academic theory and practical case studies, the curriculum provides a broad overview of the field and illustrates ways in which various concepts can be applied by practitioners in the field. The objectives of this course are, to provide an overview of theories of violent conflict; to outline the many tools available for resolving international conflict; and to deal with international negotiation and the process of preparing for negotiations. Online, 20 hours

J3OP-MN173 Conflict Management and Negotiation (v.2) Portuguese Course N/S/IP
This course is an eleven unit, self-study introduction to International Conflict Management and Negotiation. Combining academic theory and practical case studies, the curriculum provides a broad overview of the field and illustrates ways in which various concepts can be applied by practitioners in the field.
The objectives of this course are, to provide an overview of theories of violent conflict; to outline the many tools available for resolving international conflict; and to deal with international negotiation and the process of preparing for negotiations. Online, 20 hours

J3OP-MN191 Pre-Deployment Cultural Awareness Commanders Pack – Afghanistan Course N/S/IP
This course consists of a series of informative scenarios and information segments regarding pre-deployment cultural awareness in Afghanistan. It starts with a broad overview of the factors involved in cultural awareness and moves the focus to cultural awareness in country while providing a foundational introduction to the subject. Additional discussions include, definitions of cultural awareness, history and evolution of cultural awareness, scenarios surrounding cultural awareness and the use of tactics to mitigate cultural awareness issues that may arise in country. Additional resources such as language packs, country specific cultural information, and extended resources are provided. After completing the course, you will be able to describe and react to cultural awareness issues that might be encountered within in Afghanistan. Online, 4 hours

J3OP-MN192 Pre-Deployment Cultural Awareness Commanders Pack – Iraq Course N/S/IP
This course consists of a series of informative scenarios and information segments regarding pre-deployment cultural awareness in Iraq. It starts with a broad overview of the factors involved in cultural awareness and moves the focus to cultural awareness in country while providing a foundational introduction to the subject. Additional discussions include, definitions of cultural awareness, history and evolution of cultural awareness, scenarios surrounding cultural awareness and the use of tactics to mitigate cultural awareness issues that may arise in country.

Additional resources such as language packs, country specific cultural information, and extended resources are provided. After completing the course, you will be able to describe and react to cultural awareness issues that might be encountered within in Iraq. Online, 4 hours

J3OP-MN194 Definitions, Dimensions, and Categories of Terrorism Course N/S/IP
This course consists of a series of lectures and lecture notes that give specific explanations on the problems defining terrorism. It starts with a broad overview of the factors involved in defining terrorism and provides a foundation and introduction to the subject. Additional discussions include, definitions of terrorism in international law, history and evolution of terrorism and counter-terrorism, sources of terrorism, counter-terrorism and the use of force in international law, international legal response to terrorism, the role of intelligence in Defense against terrorism, the role of media in the fight against terrorism, methods of attacks and selection of targets, financing terrorism and future forms of terrorism. Online, 15 hours

J3OP-MN220 EXONAUT Operators Course N/S/IP

The EXONAUT Operators Course is for EXONAUT operators to become familiar with the basic methods and features in EXONAUT, used when planning, conducting, and evaluating an exercise. In the course the basics of handling the features of EXONAUT as well as management of an exercise will be covered.

The course discusses the principles behind an Exercise Management Tool, working with an Exercise Management Tool within the exercise control organization, setting training objectives in an exercise, planning the scenario (MEL/MIL) and its different elements, and specific EXONAUT features. Online, 2 hours

J3OP-MN221 International Security Assistance Force Headquarters Individual Augmentee Pre-Deployment (ISAF HQ IA PDC) Course N/S
This course covers all topics presented at the NSO ISAF HQ IA PDC course, to include: ISAF Command Structure; Legal Basis for ISAF Operations; Health Risks and Media Relations in Afghanistan; Social Structure, Ethnicity, Cultural Awareness, History and Politics, Language, Religion; Daily Life; Air Support; Geography; Counter Improvised Explosive Devices and IED Incident Management Procedures; Afghanistan National Security Forces (ANSF); Local Government Development; and Civil Military Cooperation (CIMIC) in Afghanistan.
Online, 13 hours

J3OP-MN222 Introduction to NATO for TACEVAL (v.1.0) Course N/S/IP
This is a short version of the "Introduction to NATO" course. It is specifically tailored to meet the needs of TACEVAL (Tactical Evaluation), and will support four (4) resident TACEVAL courses at NATO School. The course draws extensively on official NATO documentation and publications issued by the Division of Public Diplomacy, which has authorized the reproduction of all quotations, extracts from such documents, and photos used in the course. Online, 14 hours

J3OP-MN223 Introduction to NATO Conventional Targeting (v1.0) Course S
This course prepares pre-students of the NATO Conventional Targeting Course (N3-17) that will be attending the NATO School resident course in Oberammergau, Germany. It familiarizes NATO and invited nation's students with the Joint/Combined/Coalition Force applicants and targeting cycle. Furthermore, it prepares students for the course syndicates by providing a scenario overview of the Zoran Sea Crisis, and the military guidelines for this scenario. The focus of the ADL course is an Introduction to the Joint Intelligence Preparation of the Battlespace (JIPB), as well as an overview of the Commande Combined Joint Task Force's (COMCJTF's) Initial Intent and Targeting Guidance. Online, 10 hours

J3OP-MN248 Civil-Military Relations in an Interagency Context Course N/S/IP
The purpose of this course is to introduce students to the major theories and issues surrounding civil-military relations in today's world, including possible means for improvement. It provides themes for improvement in civil-military relations in the Western Hemisphere; including media-military and legislative-military relations, interagency and NGO coordination, and the role of international organizations. The course is presented by the Inter-American Defense College and has been developed in conjunction with Florida International University. Online, 20 hours

J3OP-MN267 Legal Aspects of Combating Terrorism Course N/S
This course provides an overview on the legal basis for targeting terrorism. It is composed of four modules covering the following lessons: the general framework of legal response to terrorism, combating terrorism with lawful means, harmonizing the Law of Armed Conflict, NATO, national legal requirements for fighting terrorism, and fighting terrorisms constraints ad evolutions. Online, 15 hours

J3OP-MN275 Introduction to NATO School Operational Planning Process (v 2.0) Course S
The purpose of this course is to provide students with information to prepare plans and orders for NATO operations. This distance learning course will provide users with the basic knowledge of the NATO Operational Planning Process to assist them in their understanding of certain orientation and / or operational courses at the NATO School in Oberammergau, Germany. Online, 10 hours

J3OP-MN328 Civil-Military Relations in an Interagency Context (Spanish) Course N/S/IP
The purpose of this course is to introduce students to the major theories and issues surrounding civil-military relations in today's world, including possible means for improvement. It provides themes for improvement in civil-military relations in the Western Hemisphere; including media-military and legislative-military relations, interagency and NGO coordination, and the role of international organizations. The course is presented by the Inter-American Defense College and has been developed in conjunction with Florida International University. Online, 20 hours

J3OP-MN329 Civil-Military Relations in an Interagency Context (Portuguese) Course N/S/IP
The purpose of this course is to introduce students to the major theories and issues surrounding civil-military relations in today's world, including possible means for improvement. It provides themes for improvement in civil-military relations in the Western Hemisphere; including media-military and legislative-military relations, interagency and Nongovernmental Organization (NGO) coordination, and the role of international organizations. The course is presented by the Inter-American Defense College and has been developed in conjunction with Florida International University. Online, 20 hours

J3OP-US003 Joint Targeting Staff Course Introductory Training Course N/S/IP
This is a web-based course designed to provide basic background knowledge and comprehension of key joint operational-level subject matter to prepare individuals for three resident courses conducted by the Joint Targeting School: Joint Targeting Staff Course, Joint Targeting Applications Course, and Battle Damage Assessment Course. DISCLAIMER: Terminology used in this JKO training course has been affected by recent updates to JP 3-09, JP 3-0 and JP 5-0. The content will be updated upon publication and release of the final version of JP 3-60, "Joint Targeting". Online, 7 hours

J3OP-US011 Military Response to Domestic CBRNE Attacks Course N/S/IP
The purpose of this course is to introduce nuclear, biological, and chemical (NBC) and chemical, biological, radiological, nuclear, or high-yield explosives (CBRNE) environments and explain the impact of terrorist threats emanating from CBRNE sources. This course also explains the key concepts and principles of the National Incident Management System (NIMS) and the benefits of using this system for domestic incidents. In addition, the roles and responsibilities of first responders, the equipment, supplies, and proper techniques they use in order to respond

appropriately to events involving chemical, biological, radiological, nuclear, or high-yield explosives (CBRNE) materials are described. Online, 8 hours

J3OP-US012 Joint Interagency Coordination Group (JIACG) Course N/S/IP
This course provides an overview of JIACG and its structure, describes the JIACG environment and its players, and explains the JIACG process. Online, 14 hours

J3OP-US013-02 Joint Task Force Fundamentals Course (JTF 101) Module 2: Forming a Joint Task Force Headquarters N/S
Forming a Joint Task Force Headquarters presents basic background information on forming and organizing a joint task force (JTF) headquarters. Topic areas include the functions and composition of a JTF Headquarters; the purpose and composition of various boards, bureaus, centers, cells, and working groups; and individual staff member integration requirements.
Online, 2 hours

J3OP-US013-03 Joint Task Force Fundamentals Course (JTF 101) Module 3: Joint Task Force Command and Control Considerations N/S
Joint Task Force Command and Control Considerations present command and control considerations of joint task force (JTF) organization. Topics address the establishment of command relationships between the joint force commander (JFC) and components within the JTF; JTF organizational options; and organization of the operational area. Online, 2

J3OP-US013-05 Joint Task Force Fundamentals Course (JTF 101) Module 5: Joint Operation Planning N/S
Joint Operation Planning module presents an overview of joint operation planning conducted by a joint force commander (JFC) and staff. Topics include key steps of the joint operation planning process (JOPP) and the integration of deployment planning into this process. Online, 2 hours

J3OP-US013-09 Joint Task Force Fundamentals Course (JTF 101) Module 9: Joint Fires and Targeting N/S
Joint Fires and Targeting module provides an overview of joint fires and targeting to a joint force commander (JFC) and staff. Topics include fires and targeting definitions, synchronization of joint fires, the joint targeting cycle, and organizations supporting joint fires and targeting.
Online, 2 hours

J3OP-US013-10 Joint Task Force Fundamentals Course (JTF 101) Module 10: Joint Information Operations N/S
Joint Information Operations module presents the principles of joint information operations (IO) to a joint force commander (JFC) and staff. Topics include information operations doctrine, terms and concepts; IO elements; typical Joint Task Force (JTF) IO organization; IO inputs to comprehensive approach to operations, planning, and assessment, and supporting IO organizations. Online, 2 hours

J3OP-US013-14 Joint Task Force Fundamentals Course (JTF 101) Module 14: Protection N/S
Protection module introduces the protection function for a joint force commander (JFC) and staff. The module examines protection purposes, planning considerations, staff support, and the tasks of a Protection Working Group. Online, 2 hours

J3OP-US017 Introduction to Joint Urban Operations Course N/S/IP
This course provides basic background knowledge and comprehension of key Joint Urban Operations (JUO) tasks. The course will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during Joint National Training Capability events, other joint exercises, and real-world operations. Online, 6 hours

Courses and Information Resources

J3OP-US018 Fundamentals of Personnel Recovery (FPR) Course N/S/IP
The Fundamentals of Personnel Recovery Course provides an overview of the DoD implementation of joint personnel recovery doctrine. The course familiarizes the student with all aspects of personnel recovery, from the governing directives, instructions, and joint doctrinal concepts to the importance of integrating evasion and recovery into existing operational plans to support military operations across the spectrum of conflict. It is not a tactical level course; the intent is for exposure to the personnel recovery arena from the strategic- and operational- levels of war. Online, 6.5 hours

J3OP-US019 Introduction to Joint Fire Support Course *FOUO* N/S
This course provides basic background knowledge and comprehension of key Joint Fire Support tasks, including: Joint Fire Support Overview, Joint Fire Support Basic Concepts, Joint Fire Support Employment Considerations, Joint Fire Support Systems, Joint Fire Support Planning, and Joint Fire Support Coordination and Execution. The course will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during joint events, joint exercises, and real-world operations. Lessons 4-6 will be posted November 2006. Online, 1.5 hours

J3OP-US020 Introduction to Joint Air and Missile Defense Operations Course N/S/IP
This course provides basic background knowledge and comprehension of key Air and Missile Defence tasks, including: Introduction to Counterair, Command and Control for Counterair, Offensive Counterair Operations, Defensive Counterair Operations, and Homeland Defence. The course will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during joint events, joint exercises and real-world operations. Online, 1.25 hours

J3OP-US021 Introduction to Joint Combat Identification Course N/S/IP
This course provides basic background knowledge and comprehension of key combat identification (CID) tasks. The course will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during Joint National Training Capability events, other joint exercises, and real-world operations. Online, 1 hour

J3OP-US023 Joint Antiterrorism Course N/S/IP
Joint Antiterrorism is a web-based course designed to provide basic background knowledge and comprehension of key joint strategic- and operational-level subject matter to prepare individuals assigned as members of Joint Task Force (JTF) Headquarters staffs to more effectively accomplish their assigned tasks during joint exercises and real-world operations. The course describes joint antiterrorism operations and develops proficiency in Antiterrorism/Force protection planning, vulnerability assessments, site surveys, and the technology and techniques associated with antiterrorism. Online, 10 hours

J3OP-US024 Joint Close Air Support (JCAS) Course N/S/IP
This course is designed to provide basic background knowledge and comprehension of key JCAS tasks to prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during JNTC events, other joint exercises, and real-world operations. Online, 1 hour

J3OP-US025 Joint Force Air Component Operations (JFACO) Course N/S/IP
A multi-module, web-based course that provides distance learning to personnel that, as members of combatant command staffs, will interface with the Joint Force Air Component Commander (JFACC); personnel that will augment the JFACC; and, personnel that will liaise with the JFACC. Online, 2 hours

J3OP-US027 Joint Task Force State Staff Course N/S/IP
The JTF State Staff Course educates National Guard personnel in JTF State operational-level planning and execution, in accordance with applicable federal and state authorities (State Active Duty, Title 10, Title 32, dual-status), in order to act in concert with other joint, interagency, inter-jurisdictional, and inter-governmental organizations, and instill an enduring commitment to civil-military teamwork, attitudes and perspectives. Online, 57 hours

J3OP-US028 Standing Joint Force Headquarters (SJFHQ) Course N/S/IP
The course is primarily targeted for officer or senior enlisted members of a standing joint force headquarters (SJFHQ) staff (or other joint staff functioning at the operational/strategic level), who need introductory instruction in one or more functional areas prior to participate as a member of that staff. The content is also of value to interagency personnel and others requiring a basic understanding of the organization and functioning of an SJFHQ and its enabling concepts prior to participating in a joint exercise or real-world operation. Online, 4 hours

J3OP-US093 InfoWorkSpace (IWS) v3.0 Tutorial Course N/S/IP
The InfoWorkSpace tutorial will familiarize you with the basic concepts and skills required to use InfoWorkSpace version 3.0. InfoWorkSpace is a collaboration tool that provides virtual communication and collaboration services to geographically dispersed personnel creating a virtual community in which users can attend or present briefings, store and access files, and communicate with each other via whiteboard, two-way audio, and text messaging. This tutorial also includes a "QuickFind" feature for users to refer to while Online, in IWS. This tutorial consists of an introduction to IWS and seven topic areas. It also includes links to IWS reference documents. Online, 1 hour

J3OP-US094 The Interagency Process: Full Spectrum Implementation Presentation N/S/IP
The Interagency Process: Full-Spectrum Implementation Course reviews the National level interagency process, describes how a combatant commander and staff participate in the Interagency (IA) process, highlights the major issues within the IA process, and examines some of the new organizational tools developed to improve IA coordination. The course also introduces the Joint Interagency Coordination Group (JIACG) concept. Online, 1 hour

J3OP-US095 Joint Operations Center (JOC) Presentation N/S/IP
The Joint Operations Center Course provides an overview of joint operational and deployment planning to a Joint Task Force Commander and staff. The course focuses on the actions during key steps of the operational-level planning process within crisis action planning, and the integration of deployment planning into this process. Online, 0.5 hours

J3OP-US097 Joint Individual Augmentee Training (JIAT) Course *FOUO* N/S
The JIAT Course provides the student with the basics of Joint planning and operations and lays an important foundation for the remainder of his/her preparation to serve on a Joint Task Force (JTF) Headquarters staff for current operations. The JIAT Course is composed of eight modules based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) and enhanced with examples, lessons learned, and references for additional research and information. Each module has an accompanying on-line forum to which the student may go to ask questions or converse with fellow students or subject matter experts. Online, 15.5 hours

J3OP-US098 The Joint Personnel Recovery Agency JPRA Presentation 19 April 2007 N/S/IP
The Joint Personnel Recovery Agency JPRA Presentation is directed toward individual augmentees who have no prior exposure to Personnel Recovery. Its focus is fundamentals of the DoD Personnel Recovery System. Online, 1 hour

J3OP-US111 JTF Commander's Communication Strategy Course N/S
The purpose of this course is to introduce the key elements of the Commander's Communication Strategy, its relation to the broader national level strategic communication effort, and to identify

the observed best practices of staff structure, processes, and techniques from the Joint Task Force (JTF), Combatant Command and departmental levels. Online, 2 hours

J3OP-US112 Joint Fires Observer Familiarization Course N/S/IP
The purpose of this course is to familiarize Soldiers, Marines, and small unit leaders of the joint fires and effects team and associated personnel with the skills required to integrate, coordinate and synchronize the full range of joint fires and effects, including lethal and non-lethal effects, within the effects based operations construct, to accomplish the Joint Task Force Combatant Command (JTF/COCOM) commander's objectives. Students will be trained on jointly approved Tactics, Techniques and Procedures (TTPs) such as: Artillery, Naval Surface Fire Support (NSFS), and Close Air Support (CAS). Students will also receive instruction in the operation of communications equipment and laser designating equipment Ground Vehicle Laser Locator Designator/Lightweight Laser Designator Rangefinder (G/VLLD/LLDR). Online, 22 hours

J3OP-US113 Understand Command and Control (C2) Structure for JFHQ/JTF State Staffs Course N/S/IP
The purpose of this course is to equip National Guard Officers and Non-commissioned Officers (NCOs) to effectively operate in joint organizations, in both domestic and overseas contingency environments. Graduates will understand the relationship between the enabling objectives and Joint Doctrine; Title 10 vs. Title 32; National Response Plan (NRP); National Incident Management System (NIMS); Incident Command System (ICS); Emergency Management Assistance Compact (EMAC); and Intra-governmental coordination as it applies to JFHQ/JTF State Staff operations. All content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP), enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Online, 4 hours

J3OP-US114 Command and Control (C2) Relationships within JFHQ/JTF State Staffs Course N/S/IP
The purpose of this course is to equip National Guard Officers and Non-commissioned Officers (NCOs) to effectively operate in Joint organizations in both domestic and overseas contingency environments. Graduates will understand the relationship between the enabling objectives and Joint Doctrine; Title10 vs. Title 32; National Response Plan (NRP); National Incident Management System (NIMS); Incident Command System (ICS); Emergency Management Assistance Compact (EMAC); and Intra-governmental coordination as it applies to JFHQ/JTF State Staff operations. All content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Online 1 hour

J3OP-US115 Command and Control (C2) Authorities for JFHQ/JTF State Staffs Course N/S/IP
The purpose of this course is to provide basic knowledge on operating effectively in Joint organizations in both domestic and overseas contingency environments to National Guard Officers and Non-commissioned Officers (NCOs). Graduates will understand the relationship between the enabling objectives and Joint Doctrine; Title10 vs. Title 32; National Response Plan (NRP); National Incident Management System (NIMS); Incident Command System (ICS); Emergency Management Assistance Compact (EMAC); and Intra-governmental coordination as it applies to JFHQ/JTF State Staff operations. All content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Online, 1 hour

J3OP-US120 Joint Urban Operations for the Joint Force Commanders and Staff Course N/S
The purpose of this course is to inform operational decision making in current and future joint urban operations by providing concepts as ideas for consideration that could help operational commanders plan and conduct urban operations more effectively. The course builds on prior Joint Operations Professional Military Education (PME) and/or veteran service to share with JTF and component commanders and staff the synthesis of 5 years of observations regarding how to

operate in an urban environment now and in the next few years to defeat adversaries embedded and diffused within populated urban areas, with acceptable friendly and noncombatant casualties and without causing catastrophic damage to the functioning of the society there. Twelve capabilities are presented as gaps that command and staff have to think through in order to find solutions. Online, 10 hours

J3OP-US124 Unmanned Aircraft Systems (UAS) Course N/S
This course is directed toward those officers selected to attend Joint Staff training and perform duties as JTF, Combatant, or Component Staff Planner. It is focused at the operational level of war but includes aspects of tactical UAS use. Aspects of Maritime Domain Awareness are not included in this version. Online, 8 hours

J3OP-US145 Assess Risk During JFHQ/JTF State Operations Course N/S/IP
Students that complete this course will be able to define the process of identifying, assessing, and controlling risks arising from operational factors and make decisions that balance risk cost with mission benefits. The course consists of six lessons. All content is based on US Joint Doctrine, enhanced with examples, lessons learned, and reference citations for additional research and information. Online, 1 hour

J3OP-US147 Understand Commander's Intent During JFHQ/JTF State Operations Course N/S/IP
This course aids National Guard, Reserve, and Air National Guard officer and senior NCOs serving on Joint Assignments Graduates to understand the intent of the Commander in a Joint organization and environment. All content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Online, 1 hour

J3OP-US148 Develop and Provide Briefing to Support JFHQ/JTF State Operations Course N/S/IP
The purpose of this course is to ensure all National Guard, Reserve, and Air National Guard officers and senior NCOs serving on joint assignments have a common understanding of developing and providing briefings to support JFHQ/JTF state operations. All content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Online, 1 hour

J3OP-US156 The Joint Center for Operational Analysis (JCOA) Presentation 19 April 2007 N/S/IP
The Joint Center for Operational Analysis (JCOA) Presentation reviews the JCOA organization, its roles, functions, and products. Online, 1 hour

J3OP-US158 Knowledge and Information Fusion Exchange (KnIFE) Presentation 19 April 2007 N/S/IP
The Knowledge and Information Fusion Exchange (KnIFE) Presentation discusses operational concepts and processes, where KnIFE resides and how to retrieve information from KnIFE. Online, 1 hour

J3OP-US190 Introduction to Joint Computer-Assisted Exercise (CAX) Control Course N/S/IP
This course is designed for individuals who have not previously participated in an exercise as a member of an Exercise Control Group (EGC). The course will prepare active and reserve duty military, government civilians, and contractors assigned to a Joint Exercise Control Group in support of a joint CAX. The course consists of eight lessons. All content is based on US Joint Doctrine, enhanced with examples, lessons learned, reference citations, and hyperlinks for additional research and information. Online, 5 hours

Courses and Information Resources

J3OP-US195 Contractors on the Battlefield Course N/S/IP
This course describes authorities and responsibilities for contractors; the contractual relationships and responsibilities between DoD and contractors; types of contracts and contractors; DoD policy; JTF-level responsibilities for deploying, managing, supporting, and disciplining contractors. The current legal rights, responsibilities, and ramifications of contractors in theater under current DoD guidelines and host nation agreements are discussed as well as how the various staffs within the JTF are responsible for and interact with contractors. Online, 1.5 hours

J3OP-US196 Forming the Joint Task Force Headquarters (CJTF-HOA) Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training to the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), presented 5-9 November 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with the challenges of forming a Joint Task Force Headquarters (with specific emphasis on CJTF-HOA), building the staff, and training the staff. At the conclusion of the course, the student will understand how to organize and man the JTF headquarters based on mission requirements; delineate staff roles and responsibilities; and develop a training plan to maintain core competencies within the staff. Online, 2 hours

J3OP-US197 Information Management (CJTF-HOA) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with Joint Task Force Headquarters Information Management concepts (with specific emphasis on CJTF-HOA and understand best practices employed by other Joint Task Forces. At the conclusion of the course, the student will understand how Commander's Guidance and Management is an Operations' imperative; and understand the need to codify Information Management processes. Online, 1 hour

J3OP-US198 Legal Issues (CJTF-HOA) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with Legal Issues that affect the Joint Task Force Headquarters (with specific emphasis on CJFT-HOA. At the conclusion of the course the student will development a better understanding of Rules of Engagement (ROE); understand the concept of Escalation of Force (EOF); understand pertinent Horn of Africa legal issues regarding Stability Operations, Fiscal Authorities, Investigations, Personnel Status, and Military Justice. Online, 1 hour

J3OP-US202 Staff Integration (CJTF-HOA) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with Staff Integration methods and issues that affect Joint Task Force Headquarters (with specific emphasis on CJTF-HOA. At the conclusion of the module the student will develop an understanding of how effective integration of Boards, Bureaus, Centers, Cells, and Working Groups (B2C2WGs) enhance staff support to the commander's decision cycle; understand how to integrate B2C2WGs into an effective Battle Rhythm in order to effectively organize staff efforts; understand that Boards, Centers, and Cells are flexible structures that are set up to address a need and disestablished when no longer necessary. Online, 1 hour

J3OP-US203 Joint Public Affairs (CJTF-HOA) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with Joint Public Affairs (PA) issues and approaches that affect the JTF HQ (with specific emphasis on CJTF-HOA). At the conclusion of

the course, the student will understand Joint PA and its relationship to Strategic Communications; demonstrate Joint PA linkages with planning and assessment; understand the need for a proactive approach to PA; understand that media engagement supports the commander's communication Strategy; understand Joint PA reach back support including the Joint Public Affairs Support Element (JPASE). Online, 1 hour

J3OP-US204 Comprehensive Approach (CJTF-HOA) Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training to the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), presented 5-9 November 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with a Comprehensive Approach to operations (with specific emphasis on CJTF-HOA).   At the conclusion of the course, the student will understand the complex environment and the necessity of unified action to obtain objectives; understand how a comprehensive approach to operations expands military thinking to an integrated DIME on PMESII approach in attaining objectives; and comprehend how the commander's decision cycle assists the commander in understanding the changing environment. Online, 1 hour

J3OP-US205 Theater Logistics Operations (CJTF-HOA) Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training to the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), presented 5-9 November 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with Theater Logistics Operations that will impact the Joint Task Force Headquarters (with specific emphasis on CJTF-HOA).   At the conclusion of the course, the student will understand Joint Logistics doctrinal information; understand the Theater Logistics concept; understand the logistic organization's support of the commander's decision cycle; and understand the role of J4 and Joint Logistics Command. Online, 1 hour

J3OP-US207 Intelligence Fusion and Intelligence Sharing (CJTF-HOA) Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training to the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), presented 5-9 November 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with Joint Task Force Headquarters Intelligence Fusion and Sharing organizations and processes (with specific emphasis on CJTF-HOA). At the conclusion of the course the student will understand key intelligence organizations and functions; understand the need for clear C2 relationships for Intelligence operations; understand the need for intelligence organizations to support the Commander's decision cycle; be aware of the basic CJ2 structure at CJTF-HOA; and understand Commander's Critical Information Requirements relationship to the collection process. Online, 1 hour

J3OP-US208 Interagency Perspective and Integration (CJTF-HOA) Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training to the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), presented 5-9 November 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with interagency issues and challenges that affect the Joint Task Force Headquarters (with specific emphasis on CJTF-HOA). At the

conclusion of the course the student will understand Interagency coordination challenges; define Department of State and Department of Defense authorities; understand the need for coordination with international and nongovernmental organizations; and understand the widespread nature of interagency activities in the CJTF-HOA AOR. Online, 1 hour

J3OP-US209 The Commanders' Communication Strategy Course (CJTF-HOA) N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training to the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), presented 5-9 November 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with Strategic Communication and associated challenges (with specific emphasis on CJTF-HOA). At the conclusion of the course, the student will understand Strategic Communication and its definition; understand the Commander's Communication Strategy; and understand the challenges involved in developing the Commander's Communication Strategy. Online, 1 hour

J3OP-US210 Joint Information Operations (CJTF-HOA) Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training to the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), presented 5-9 November 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with the challenges, capabilities, and issues related to Joint Information Operations (IO) (with specific emphasis on CJTF-HOA). At the conclusion of the course, the student will understand that Information Operations is integral to the operational planning process; understand IO capabilities and definitions; and understand supporting IO organizations and their synergistic results. Online, 1 hour

J3OP-US212 Sikh-American Head Coverings, Muslim-American Head Coverings, and Sikhs and the Kirpan Course N/S/IP
The information is provided by the Department of Homeland Security, Office for Civil Rights and Civil Liberties to provide enhanced cultural awareness and foster interagency collaboration. In addition to describing the significance of Common Sikh American Head Coverings, Common Muslim American Head Coverings, and Sikh Americans and the Kirpan, it also discusses the proper procedure for searching an individual wearing one of the head coverings. Online, 1 hour

J3OP-US216 Guidance Regarding the Use of Race for Law Enforcement Officers Course N/S/IP
The purpose of this course is to provide a brief introduction to Department of Homeland Security (DHS) policy and the Department of Justice guidance regarding the use of Race by federal law enforcement agencies. The information is provided by the DHS, Office for Civil Rights and Civil Liberties, to provide enhanced cultural awareness and foster interagency collaboration. Online, 1 hour

J3OP-US217 The First Three to Five Seconds: Arab and Muslim Cultural Awareness for Law Enforcement Course N/S/IP
This course on Arab and Muslim Cultural Awareness for Law Enforcement is a brief introduction to Department of Homeland Security (DHS) policy. Online, 1 hour

J3OP-US218 Operational Protection (CJTF-HOA) Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training presented 7-18 January 2008, to the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), during the CJTF-HOA 08-1 Mission Rehearsal Exercise (MRX). The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the CJTF-HOA staff who were unable to participate in the formal

in-house training at JWFC as part of the core staff. The student will become familiar with the concepts and challenges of Operational Level Force Protection (with specific emphasis on CJTF-HOA). Upon completion of this course the student will be able to: understand the difference between force protection and operational protection; discuss elements of operational protection; summarize staff roles and responsibilities for Operational Protection; identify planning considerations and enablers for Operational Protection. Online, 1 hour

J3OP-US219 CJTF-HOA Exercise Scenarios Course N/S
This training was developed at the US Joint Forces Command/Joint Warfighting Center (JWFC). The prospective CJTF-HOA Commander and Staff participated in the CJTF-HOA 08-1 Mission Rehearsal Exercise (MRX) from 10 -17 January 2008 at the Joint Warfighting Center (JWFC). These exercise scenarios are designed to re-enforce learning from the academic phase of the Joint Individual Augmentee Training (JIAT) program.   These scenarios were developed from exercise events in the MRX.   Online, 1 hour

J3OP-US224 Intelligence Support to Operations (OIF) Unclassified Course N/S
At the conclusion of this course, the student will understand key intelligence organizations and their functions; understand the need for clear C2 relationships for Intelligence operations; understand the need for intelligence organizations to support the Commander's decision cycle; understand the benefit of expanding JIPB from a Mil-centric battlefield focus to a PMESII environment focused JIPOE; and understand the Commander's Critical Information Requirements relationship to the collection process. Online, 1 hour.

J3OP-US225 Intelligence Support to Operations (OIF) Classified Course S
At the conclusion of this course, the student will understand key intelligence organizations and their functions; understand the need for clear C2 relationships for Intelligence operations; understand the need for intelligence organizations to support the Commander's decision cycle; understand the benefit of expanding JIPB from a Mil-centric battlefield focus to a PMESII environment focused JIPOE; and understand the Commander's Critical Information Requirements relationship to the collection process. Online, 1 hour.

J3OP-US226 Comprehensive Approach Overview (OIF) Unclassified Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training seminars presented to the XVIII Airborne Corps during Exercise UNIFIED ENDEAVOR 07-2, 6 –10 August 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff. The student will become familiar with a comprehensive approach to Operations, with specific emphasis on MNC-I. At the conclusion of the course, the student will understand the complex environment and the necessity of unified action to obtain objectives; understand how an effects-based approach to operations expands military thinking to an integrated DIME on PMESII approach in attaining objectives; and comprehend how the commander's decision cycle assists the commander in understanding the changing environment. Online, 1 hour

J3OP-US227 Comprehensive Approach Overview (OIF) Classified Course S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training seminars presented to the XVIII Airborne Corps during Exercise UNIFIED ENDEAVOR 07-2, 6 –10 August 2007. The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff. The student will become familiar with a comprehensive approach to Operations, with specific emphasis on MNC-I. At the conclusion of the course, the student will understand the complex environment and the necessity of unified action to obtain objectives; understand how a comprehensive approach to operations expands military thinking to an

integrated DIME on PMESII approach in attaining objectives; and comprehend how the commander's decision cycle assists the commander in understanding the changing environment. Online, 1 hour

J3OP-US228 Joint Civil Military Operations (CJTF-HOA) Course N/S
This presentation was delivered at the US Joint Forces Command/Joint Warfighting Center (JWFC) during the CJTF-HOA 08-1 Mission Rehearsal Exercise (MRX). The audience was the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), presented 7-18 January 2008. The purpose of this presentation is to provide an overview of Joint Civil Military Operations (CMO) that affects the Joint Task Force. The presentation will illustrate Civil Military Operations as common military functions and frame operational level thinking for military operations relative to a civilian environment. Upon completion of this presentation the student will: develop a better appreciation of how CMO contributes to gaining access and relationships with host nation governments; understand that CMO supports Diplomacy, Development and Defense; understand CMO is a command responsibility; understand that DoS lead for Title 22 development; and Effects Based Planning will determine CMO activities. Online, 1 hour

J3OP-US231 Civil Military Operations and Humanitarian Assistance Program (CJTF-HOA) Course N/S
This presentation was delivered at the US Joint Forces Command/Joint Warfighting Center (JWFC) during the CJTF-HOA 08-1 Mission Rehearsal Exercise (MRX). The audience was the core staff for Combined Joint Task Force-Horn of Africa (CJTF-HOA), presented 7-18 January 2008. The purpose of this presentation is to provide an overview of Civil Military Operations (CMO) and Humanitarian Assistance (HA) Programs being conducted in the Horn of Africa Combined Joint Area of Operations (CJOA). Upon completion of this presentation the student will have a better appreciation of the Environmental Complexities of the Region; CMO Coordination efforts; HA funding and authorities; HA supporting elements; and HA projects in the CJOA. Online, 1 hour

J3OP-US232 Senior Leader Course for Installation CBRN Defense Course N/S/IP
The CBRN Senior Leader course for Installation Defense is intended for senior leaders who are directly responsible for the CBRN defense of an installation. CBRN installation defense is a part of an overarching Installation Protection Program (IPP) and involves planning, resources, and executing for potential CBRN threats. The course includes a Post test. Online, 4 hours

J3OP-US233 Legal Aspects of Joint Operations (OIF, OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the staffs in Iraq and Afghanistan who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with Legal Aspects of Joint Operations that affect the Joint Task Force Headquarters and the Commander's decision process. At the conclusion of this course the student will develop a better understanding of Rules of Engagement (ROE); understand the concept of Escalation of Force (EOF); understand complications of multinational Rules of Engagement, Fiscal Authorities, Investigations, Personnel Status, Contractor issues, and Military Justice. Online, 1 hour

J3OP-US234 Integration Within the Joint Staff (OIF) Unclassified Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training seminars presented to the XVIII Airborne Corps during Exercise UNIFIED ENDEAVOR 07-2, 6 –10 August 2007. The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff. The student will become familiar with Staff Integration methods and issues that affect the Joint Task Force Headquarters. At the conclusion of the module the student will develop an understanding of how effective integration of Boards, Bureaus, Centers, Cells, and Working Groups (B2C2WGs) enhance staff support to the Commander's decision cycle;

understand how to integrate B2C2WGs into an effective Battle Rhythm in order to effectively organize staff efforts; understand that Boards, Centers, and Cells are flexible structures that are set up to address a need and disestablished when no longer necessary. Online, 1 hour

J3OP-US235 Deployment, Distribution and JTF Logistics (OIF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff. The student will become familiar with Deployment, Distribution, and Joint Task Force Logistics Operations that will impact the Joint Force Headquarters. At the conclusion of the course, the student will be able to: discuss the Deployment and Distribution Concept; describe the function of the Joint Deployment Distribution Operations Center; Describe the Theater Logistics Environment; understand J4 support to decision making; and discuss the role of the J4 and Joint Logistics Command. Online, 1hour

J3OP-US236 Interagency Coordination (OIF) Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training seminars presented to the XVIII Airborne Corps during Exercise UNIFIED ENDEAVOR 07-2, 6 –10 August 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff.   The student will become familiar with interagency issues and challenges that affect the Joint Task Force Headquarters. At the conclusion of the course the student will understand Interagency coordination challenges; define Department of State and Department of Defense authorities; understand the need for coordination with international and nongovernmental organizations; and understand the widespread nature of interagency activities in the United States Central Command Area of Operations (USCENTCOM AOR). Online, 1 hour

J3OP-US237 Joint Information Operations (OIF) Unclassified Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training seminars presented to the XVIII Airborne Corps during Exercise UNIFIED ENDEAVOR 07-2, 6 –10 August 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff.   The student will become familiar with the challenges, capabilities, and issues related to Joint Information Operations (IO). At the conclusion of the course, the student will understand that Information Operations is integral to the operational planning process; understand IO capabilities and definitions; and understand supporting IO organizations and their synergistic results. Online, 1 hour

J3OP-US238 Joint Public Affairs (OIF) Course N/S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training seminars presented to the XVIII Airborne Corps during Exercise UNIFIED ENDEAVOR 07-2, 6 –10 August 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff.   The student will become familiar with Joint Public Affairs (PA) issues and approaches that affect the Joint Task Force Headquarters. At the conclusion of the course the student will understand Joint PA and its relationship to Strategic Communications; demonstrate Joint PA linkages with planning and assessment; understand the need for a proactive approach to PA; understand that media engagement supports the Commander's Communication Strategy; understand Joint PA reach back support including the Joint Public Affairs Support Element (JPASE). Online, 1 hour

Courses and Information Resources

J3OP-US239 Planning (OIF) Course N/S
At the conclusion of this course, the student will: understand that planning is commander-Centric; understand the environment and frame the problem prior to attempting to solve it; recognize the need to spend time organizing the headquarters for planning; understand roles and considerations in planning; recognize that assessment drives planning; and understand the importance of including Stakeholders in the planning process. Online, 1 hour

J3OP-US240 Commander's Communication Strategy (OIF) Unclassified Course N/S
The student will become familiar with Strategic Communication and will understand its definition; understand the Commander's Communication Strategy; and understand the challenges involved in developing the Commander's Communication Strategy. Online, 1 hour

J3OP-US242 Information Sharing (OIF) Course N/S
The student will become familiar with Joint Task Force Headquarters Information Management concepts and understand the best practices employed by other Joint Task Forces. At the conclusion of the course, the student will understand how commander's Guidance and Commander's Critical Information Requirement (CCIR) focus the staff to support decision-making; understand that Information Management is an Operations' imperative; and understand the need to codify Information Management processes. Online, 1 hour

J3OP-US243 Integration Within the Joint Staff (OIF) Classified Course S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training seminars presented to the XVIII Airborne Corps during Exercise UNIFIED ENDEAVOR 07-2, 6 –10 August 2007.
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff. The student will become familiar with Staff Integration methods and issues that affect the Joint Task Force Headquarters. At the conclusion of the module the student will develop an understanding of how effective integration of Boards, Bureaus, Centers, Cells, and Working Groups (B2C2WGs) enhance staff support to the Commander's decision cycle; understand how to integrate B2C2WGs into an effective Battle Rhythm in order to effectively organize staff efforts; understand that Boards, Centers, and Cells are flexible structures that are set up to address a need and disestablished when no longer necessary. Online, 1 hour

J3OP-US244 Commander's Communication Strategy (OIF) Classified Course S
The student will become familiar with Strategic Communication and will understand its definition; understand the Commander's Communication Strategy; and understand the challenges involved in developing the Commander's Communication Strategy. Online, 1 hour

J3OP-US245 Joint Information Operations (OIF) Classified Course S
This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training seminars presented to the XVIII Airborne Corps during Exercise UNIFIED ENDEAVOR 07-2, 6 –10 August 2007. The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff. The student will become familiar with the challenges, capabilities, and issues related to Joint Information Operations (IO). At the conclusion of the course, the student will understand that Information Operations is integral to the operational planning process; understand IO capabilities and definitions; and understand supporting IO organizations and their synergistic results. Online, 1 hour

J3OP-US250 Information Assurance (IA) Awareness Course N/S/IP
The IA Awareness product is produced to meet the Federal Information Security Management Act (FISMA) and DoD 8570.01-M requirements that all DoD Information Systems (IS) users are given

training on computer and network security. FISMA and 8570 also require that completion of the training be tracked electronically, thus the requirement is to hose the existing training on a LMS accessible to all DoD IS users. The course provides details on social engineering, internet security, threats and vulnerabilities, malicious code, user roles and responsibilities, and personally identifiable information. Online, 1 hour

J3OP-US256 Branch and Sequel Planning (OIF) Course N/S
At the conclusion of this course, the student will: understand that planning is commander-Centric; understand the environment and frame the problem in relation to the three event horizons; recognize the need to plan for branches and Sequels over the course of the mission time frame; understand roles and considerations in planning; recognize that assessment drives planning over the three events horizons; and understand the importance of including the commander's input into the planning process. Online, 1 hour

J3OP-US257 Emergency Preparedness Response Course (EPRC) – Clinician Long Course N/S/IP
The purpose of this course is to prepare healthcare providers (doctors, dentists, nurses, physician assistants, nurse anesthesiologists, and independent duty corpsmen/medics) to effectively manage casualties during an all-hazards incident, including those emanating from chemical, biological, radiological, nuclear, or high-yield explosives (CBRNE) sources. This course also explains the history and current threat of CBRNE use, the characteristics of threat agents, the pathophysiology and treatment of agent exposure, and the principles of management of threat agent casualties. The course is presented in accordance with the Tri-Service CBRNE Medical Training Program and meets initial training requirements for healthcare providers. Online, 13 hours

J3OP-US258   Emergency Preparedness Response Course (EPRC) – Clinician Short Course N/S/IP
The purpose of this course is to provide refresher/sustainment training to prepare healthcare providers (doctors, dentists, nurses, physician assistants, nurse anesthesiologists, and independent duty corpsmen/medics) to effectively manage casualties during an all-hazards incident including those emanating from chemical, biological, radiological, nuclear, or high-yield explosives (CBRNE) sources. This course also explains the history and current threat of CBRNE use, the characteristics of threat agents, the pathophysiology and treatment of agent exposure, and the principles of management of threat agent casualties. The course is presented in accordance with the Tri-Service CBRNE Medical Training Program and meets sustainment training requirements for healthcare providers. Online, 8 hours

J3OP-US259 Emergency Preparedness Response Course (EPRC) – Operator Long Course N/S/IP
The purpose of this course is to prepare personnel to effectively respond to an all-hazards incident including those emanating from chemical, biological, radiological, nuclear, or high-yield explosives (CBRNE) sources. This course also explains the current global threat of CBRNE use, the characteristics and effects of threat agents, principles of personal protection, agent detection, recognition and emergency treatment of agent exposure, and the principles of triage and decontamination of CBRNE agent casualties. The course is presented in accordance with the Tri-Service CBRNE Medical Training Program and meets initial training requirements for military personnel, DoD civilians and contractors working within the Military Healthcare System (MHS) providing security support or non-direct patient care. Online, 13 hours

J3OP-US260 Emergency Preparedness Response Course (EPRC) – Operator Short Course N/S/IP
The purpose of this course is to provide refresher/sustainment training to prepare personnel to effectively respond to an all-hazards incident including those emanating from chemical, biological, radiological, nuclear, or high-yield explosives (CBRNE) sources. This course also explains the

current global threat of CBRNE use, the characteristics and effects of threat agents, principles of personal protection, agent detection, recognition and emergency treatment of agent exposure, and the principles of triage and decontamination of CBRNE agent casualties. The course is presented in accordance with the Tri-Service CBRNE Medical Training Program and meets sustainment training requirements for military personnel, DoD civilians and contractors working within the Military Healthcare System (MHS) providing security support or non-direct patient care. Online, 8 hours

J3OP-US261 Emergency Preparedness Response Course (EPRC) – Basic Awareness Course N/S/IP
The purpose of this course is to provide an overview of the different types of Chemical, Biological, Radiological, Nuclear, or high-yield explosives (CBRN) threats, information on how to prepare for and recognize a CBRNE threat, and instructions on the protective measures. It also explains disaster management and the actions to take to prepare for, respond to, and recover from an all-hazards incident. The course is presented in accordance with the Tri-Service CBRNE Medical Training Program and meets training requirements for DoD Civilians non-medical/non-security civilian employees and contractors within the Military Healthcare System (MHS) to include but not limited to housekeepers, office workers and facility workers. Online, 2 hours

J3OP-US262 Emergency Preparedness Response Course (EPRC) – Executive/ Commander Course N/S/IP
The purpose of this course is to provide an overview of the National Incident Command System, National Response Framework, and the response from the local, state, and national levels during an all-hazards incident. It describes how DSCA fits into the missions of homeland security (HLS) and homeland Defense (HLD) and describes how DoD supports HLS and HLD missions to provide civil support. The course is presented in accordance with the Tri-Service CBRNE Medical Training Program and meets training requirements for military executives and commanders working within the Military Healthcare System (MHS). Online, 6 hours

J3OP-US263 Single Mobility System (SMS) Overview Course S
The purpose of this course is to provide the learner with a basic understanding of the Single Mobility System (SMS) application software and why it is such a valuable tool. The SMS is a web-based computer system that provides visibility of air, sea, and land transportation assets, and provides aggregated reporting of cargo and passenger movements. Online, 1 hour

J3OP-US268 Defense Courier Division Course N/S/IP
The purpose of this course is to increase the efficiency and effectiveness of the defense courier on-the-job training program. This course will reinforce all information covered in the in-residence initial training course. Upon completion of this course, all defense couriers will be able to perform the duties associated with the rapid and secure movement of national security materiel.
Online, 8 hours.

J3OP-US271 Deployment, Distribution and Joint Task Force Logistics (OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA) assigned to the Combined Joint Task Force-82 (CJTF-82) or International Security Assistance Force (ISAF) Regional Command-East (RC-East) staffs who were unable to participate in the formal training seminars held at Ft. Campbell, KY as part of the core staff. The student will become familiar with Deployment, Distribution and Joint Task Force Logistics Operations that will impact the Joint Force Headquarters. At the conclusion of this course, the student will be able to: discuss the Deployment and Distribution Concept; describe the function of the Joint Deployment Distribution Operations Center; describe the Theater Logistics Environment; understand logistics directorate of a joint staff (J4) support to decision making; and discuss the role of the J4 and Joint Logistics Command. This course is derived from the US Joint Forces Command/Joint Warfighting Center (USJFCOM/JWFC) Deployable Training Team academic training seminars presented to the 101st

Airborne Division during Exercise UNIFIED ENDEAVOR 08-1, 30 July to 03 August 2007. Online, 1 hour

J3OP-US272 DoD 101-Interagency Course N/S/IP
The purpose of this course is to educate and inform individuals in the Department of Defense (DoD) and other US government Agencies on the fundamental workings of DoD as an entity within the US Government and how DoD works within the interagency process. Online, 1 hour

J3OP-US274 Planning (OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Combined Joint Task Force-82 (CJTF-82) or International Security Assistance Force (ISAF) Regional Command-East (RC-East) staffs who were unable to participate in the formal training seminars held at Ft. Campbell, KY as part of the core staff. The student will become familiar with the Joint Operational Planning Process. At the conclusion of the course, the student will; understand that planning is Commander-Centric; understand the environment and frame the problem prior to attempting to solve it; recognize the need to spend time organizing the headquarters for planning; understand Roles and considerations in planning; recognize that assessment drives planning; and understand the importance of including Stakeholders in the planning process. Online, 1 hour

J3OP-US277 Public Communication to Support the Commander's Strategy (OEF) Course N/S
The student will become familiar with public communications issues and approaches that support the commander's communication strategy and that affect the JTF HQ. At the conclusion of the course, the student will understand joint Public Affairs (PA) and its relationship to strategic communications; understand available means to execute the commander's communication strategy; understand available means to execute the commander's communication strategy; understand the need for a proactive approach to PA; understand that proactive media engagement supports the commander's communication strategy; and understand joint PA reach back support including the Joint Public Affairs Support Element (JPASE). Online, 1 hour

J3OP-US278 Intelligence Support to Operations (OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IAs) assigned to the Combined Joint Task Force-82 (CJTF-82) or International Security Assistance Force (ISAF) Regional Command-East (RC-East) staffs who were unable to participate in the formal training seminars held at Ft. Campbell, KY as part of the core staff. The course is in reference to the US Joint Forces Command/Joint Warfighting Center (JFCOM/JWFC) Deployable Training Team academic training seminars presented to the 101st Airborne Division during Exercise UNIFIED ENDEAVOR 08-1, 30 July to 03 August 2007. Students will become familiar with Joint Task Force Headquarters intelligence fusion and sharing organizations, and processes (with specific emphasis on OEF). At the conclusion of the course students will understand key intelligence organizations and functions, understand the need for clear C2 relationships for Intelligence operations, understand the need for intelligence organizations to support the Commander's decision cycle, understand the benefit of expanding JIPB from a Mil-centric battlefield focus to a PMESII environment focused JIPOE, and understand Commander's Critical Information Requirements relationship to the collection process. Online, 1 hour

J3OP-US279 Intelligence Support to Operations (OEF) SECRET Course S
The purpose of this course is to familiarize the student with Joint Task Force Headquarters intelligence fusion and sharing organizations and processes (with specific emphasis on Operation Enduring Freedom {OEF}). At the conclusion of the course the student will understand key intelligence organizations and functions; understand the need for clear C2 relationships for Intelligence operations; understand the need for intelligence organizations to support the Commander's decision cycle; understand the benefit of expanding Joint Intelligence Preparation of the Battlespace (JIPB) from a Mil-centric battlefield focus to a Political, Military, Economic, Social, Infrastructure, and Information (PMESII) environment focused Joint Intelligence

Preparation of the Operational Environment (JIPOE); and understand Commander's Critical Information Requirements relationship to the collection process. This course is in reference to the US Joint Forces Command/Joint Warfighting Center (JWFC) Deployable Training Team academic training seminars presented to the 101st Airborne Division during Exercise UNIFIED ENDEAVOR 08-1, 30 July to 03 August 2007. Online, 1 hour

J3OP-US280 Comprehensive Approach (OEF) Course N/S
The student will become familiar with comprehensive approach. At the conclusion of this course, the student will understand the complex environment and necessity of unified action to obtain objectives; understand how an comprehensive approach to operations expands military thinking to an integrated DIME on PMESII approach in attaining objectives; and comprehend how commander's decision cycle assist the commander in understand the changing environment. Online, 1 hour

J3OP-US282 Information Sharing (OEF) N/S
At the conclusion of this course, the student will understand how Commander's Guidance and CCIR focus the staff to support decision-making; understand that Knowledge/Information Management is a Operations imperative; and understand the need to codify Information Management processes. Online, 1 hour

J3OP-US283 Interagency Coordination (OEF) Course N/S
At the conclusion of the course, students will understand Interagency coordination challenges, be able to identify Department of State and Department of Defense authorities, understand the need for coordination with international and nongovernmental organizations, understand the role of IA in the Commander's Decision Cycle, and understand the widespread nature of interagency activities in the CENTCOM AOR. This course is derived from the US Joint Forces Command/Joint Warfighting Center (JFCOM/JWFC) Deployable Training Team academic training seminars presented to the 101st Airborne Division during Exercise UNIFIED ENDEAVOR 08-1, 30 July to 03 August 2007. Online, 1 hour

J3OP-US284 Commander's Communication Strategy (OEF) Course N/S
At the conclusion of the course, the student will understand Strategic Communication and its definition, understand the Commander's Communication Strategy, and understand the challenges involved in developing the Commander's Communication Strategy. This course is derived from the US Joint Forces Command/Joint Warfighting Center (JFCOM/JWFC) Deployable Training Team academic training seminars presented to the 101st Airborne Division during Exercise UNIFIED ENDEAVOR 08-1, 30 July to 03 August 2007. Online, 1 hour

J3OP-US292 Integration within the JTF Staff (OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Combined Joint Task Force-82 (CJTF-82) or International Security Assistance Force (ISAF) Regional Command-East (RC-East) staffs who were unable to participate in the formal training seminars held at Ft. Campbell, KY as part of the core staff. The student will become familiar with Staff Integration methods and issues that affect Joint Task Force Headquarters. At the conclusion of the module the student will develop an understanding of how effective integration of Boards, Bureaus, Centers, Cells, and Working Groups (B2C2WGs) enhance staff support to the Commander's decision cycle; understand how to integrate B2C2WGs into an effective Battle Rhythm in order to effectively organize staff efforts; understand that Boards, Centers, and Cells are flexible structures that are set up to address a need and disestablished when no longer necessary. Online, 1 hour

J3OP-US293 Joint Information Operations (OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Combined Joint Task Force-82 (CJTF-82) or International Security Assistance Force (ISAF) Regional Command-East (RC-East) staffs who were unable to participate in the formal training

seminars held at Ft. Campbell, KY as part of the core staff. The student will become familiar with the challenges, capabilities, and issues related to Joint Information Operations (IO). At the conclusion of the course, the student will understand that Information Operations is integral to the operational planning process; understand IO capabilities and definitions; and understand supporting IO organizations and their synergistic results. Online, 1 hour

J3OP-US294 Integration of Lethal and Non-Lethal Actions (OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Combined Joint Task Force-82 (CJTF-82) or International Security Assistance Force (ISAF) Regional Command-East (RC-East) staffs who were unable to participate in the formal training seminars held at Ft. Campbell, KY as part of the core staff. The student will become familiar with the integration of lethal and non-lethal actions and the challenges of integrating them into the planning process. At the conclusion of the course, the student will understand integrating lethal and non-lethal actions from all elements of national power; how to include outside non-military stakeholders in planning and execution; how to utilize non-traditional collection means; and how to assist J3 and J5 in the planning process at its earliest stages. Online, 1 hour

J3OP-US298 Department of State 101-Interagency Course N/S/IP
The purpose of this course is to educate and inform individuals in the Department of Defense (DoD) and other US Government Agencies on the fundamental workings of the DoS and how it operates within the interagency process. The student will become familiar with the history, organization, functions, and roles and responsibilities of DoS. At the conclusion of the course, the student will understand how the DoS is set up and how it compares to DoD and other agencies in the US Government as well as how it functions within both the interagency process and with DoD. This course is to be offered in conjunction with the DoD and United States Agency for International Development (USAID) Interagency 101 courses. Online, 1 hour

J3OP-US309 Operations Issues of Command and Control (OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Combined Joint Task Force-82 (CJTF-82) or International Security Assistance Force (ISAF) Regional Command-East (RC-East) staffs who were unable to participate in the formal training seminars held at Ft. Campbell, KY as part of the core staff. The student will become familiar with command relationships and associated challenges and how to leverage well-established command and control structures. At the conclusion of the course, the student will understand the complexity of operational command and control in a multinational and interagency environment. Online, 1 hour

J3OP-US323 Joint Task Force Transition Planning (CJTF-HOA, OIF, OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the staffs in Horn of Africa, Iraq and Afghanistan who were unable to participate in the formal in-house training at JWFC as part of the core staff. The student will become familiar with Joint Task Force Transition Planning of Joint Operations that affects the Joint Task Force Headquarters and the Commander's decision process. At the conclusion of the course, the student will be able to identify the challenges associated with transitions; provide doctrinal and interagency perspectives on operational phases and transitions; review and reorganize both the headquarters and the force as necessary to accomplish transition tasks; ensure inclusion with other stakeholders for unity of effort and a clear delineation of responsibilities. Online, 1 hour

J3OP-US331 Combat Stress and Post Traumatic Stress Disorder (CJTF-HOA, OIF, OEF) Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the staffs in Horn of Africa, Iraq and Afghanistan. At the conclusion of the course, the student will be familiar, at a fundamental level, with the definitions of various types of combat stress and Post-traumatic Stress Disorder (PTSD); its causes; coping mechanisms; what to watch for; what to do; and how to help each other in times of stress. The course will also deal with the transition home

after prolonged deployments in theater. Finally, additional references are provided for more information on the subject. Online, 1 hour

J3OP-US334 OIF Exercise Scenarios Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IAs) assigned to the Multi-National Corps – Iraq (MNC-I) staff who were unable to participate in the formal training seminars held at Ft. Bragg, NC as part of the core staff. This training was developed at the US Joint forces Command/Joint Warfigting Center JWFC). The prospective MNC-I commander and Staff participated in the MNC-I UNIFIED ENDEAVOR 07-2 Mission Rehearsal Exercise (MRX) from 6-10 august 2007 at the JWFC. These exercise scenarios are designed to re-enforce learning from the academic phase of the Joint Individual Augmentee Training (JIAT) program. These scenarios were developed from exercise events in the Movement Report System (MRS). Online, 1 hour

J3OP-US339 Dynamics of International Terrorism Course N/S/IP
The purpose of this course is to provide situational awareness of terrorism fundamentals and personal protection measures for Special Operations Forces (SOF). Online, 8 hours

J3OP-US340 Introduction to Special Operations Forces (SOF) Course N/S/IP
The purpose of this course is to provide situational awareness of Special Operations Forces (SOF) roles and missions. This course is part of "on-boarding" process to SOF for newly assigned personnel. Online, 3 hours

J3OP-US342 Joint Information Operations (OEF) Course S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Combined Joint Task Force-82 (CJTF-82) or International Security Assistance Force (ISAF) Regional Command-East (RC-East) staffs who were unable to participate in the formal training seminars held at Ft. Campbell, KY as part of the core staff.   The student will become familiar with the challenges, capabilities, and issues related to Joint Information Operations (IO). At the conclusion of the course, the student will understand that Information Operations is integral to the operational planning process; understand IO capabilities and definitions; and understand supporting IO organizations and their synergistic results. Online, 1 hour

J3OP-US344 OEF Exercise Scenarios Course N/S
The purpose of this course is to educate and train the Individual Augmentees (IA's) assigned to the Combined Joint Task Force-101 (CJTF-101) or International Security Assistance Force (ISAF) Regional Command-East (RC-East) staffs who were unable to participate in the formal training seminars held at Ft. Campbell, KY as part of the core staff. The prospective CJTF-101 Commander and Staff participated in the Mission Rehearsal Exercise (MRX) UNIFIED ENDEAVOR 08-1, 30 July to 03 August 2007. These exercise scenarios are designed to re-enforce learning from the academic phase of the Joint Individual Augmentee Training (JIAT) program. These scenarios were developed from exercise events in the MRX. Online, 1 hour

J3OP-US345 USAID 101-Interagency Course N/S/IP
The purpose of this course is to educate and inform individuals in the DoD and other US Government Agencies on the fundamental workings of the US Agency for International Development (USAID) and how it operates within the interagency process. The student will become familiar with the history, organization, functions, and roles and responsibilities of USAID. At the conclusion of the course, the student will understand how USAID is set up and how it compares to DoD and other agencies in the US Government as well as how it functions within both the interagency process and with DoD. This course is to be offered in conjunction with the DoD 101-Interagency and DoS 101-Interagency courses. Online, 1 hour

Courses and Information Resources

J3OP-US358 Serving Abroad for Families and Employees (SAFE) Course N/S/IP
The purpose of this course is to provide a safety and security training to Drug Enforcement Administration (DEA) employees and their families assigned or Temporary Duty (TDY) overseas. This is a DoS requirement for issuance of country clearance. Online, 5 hours

J3OP-US362 Commander's Communication Strategy (OIF-09) Course N/S
The purpose of this course is to educate and train the student to understand strategic communication, its definition, the Commander's Communication Strategy, and the challenges involved in developing the Commander's communication Strategy. Online, 1 hour

J3SN-MN038 Combating Terrorism and Illegal Trafficking Course N/S/IP
This course provides information on such topics as: Definition, Reasons, Targets, Aims and Strategies of Terrorism; Terrorist Tactics and Their Destructions; Tactics and Techniques in Combating Terrorism; The Intelligence in the Fight Against Terrorism; Human Rights Issues on Combating Terrorism and Military/Security Operations; Organization for Security and Cooperation in Europe (OSCE) Code of Conduct (CoC); Public Relations in the Fight Against Terrorism; International Terrorism and Its Financial Sources; International Organizations' Studies Related to Combating Terrorism; Terrorism in Turkey and Turkey's Policy for the Fight Against Terrorism; Future Terrorist Tactics and Counter Measures; General Principles for Protection (Safety) of International Refugees; Illegal Immigration and Human Trafficking; International Arms Trafficking; International Drug Trafficking; International Cooperation on combating with Human, Arm and Drug Trafficking; and Terrorism, Organized Crime and Money Laundering. The course content provider is the Turkish General Staff PfP Training Center. This web-based course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). It is offered here for informational purposes only, without accreditation or instructor interaction. Online, 44 hours

J3SN-MN039 Combating Trafficking in Human Beings Course N/S/IP
This course introduces you to the widespread problem of Trafficking in Human Beings (THB) and the possibility to combat that special field of organized crime. It also introduces you to the NATO Policy on combating trafficking in human beings and the impact of THB on NATO-led operations. Online, 2 hours

J3SN-MN047 Terrorism and Its Implications for Democratic States Course N/S/IP
The primary purpose of this course is to dispel the myth that one man's freedom fighter is another man's terrorist. It provides a better appreciation of terrorism and what a country can do to negate the effects of this persistent problem. The course content provider is the George C. Marshall European Center for Security Studies. This web-based course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). Since this course is offered here for informational purposes only, without accreditation or instructor interaction, it is not necessary to prepare/submit the Case Study at the end of the course. Online, 5 hours

J3SN-MN103 Introduction to Public International Law Course N/S/IP
This course is offered as a self-paced, non-assessed, introductory course to the topic of 'Public International Law', with an emphasis on how this strand of international law impinges on military operations. Central to this course will be the matter of 'Jus Ad Bellum', or the use of force as an instrument of National Policy. Discussion will also occur on the matter of 'Jus In Bellow' or those rules which apply to both International and Non-International Conflict. Reference will be made to the sources of public international law and the general principles which underpin this body of law. The course aim is to introduce participants to Public International Law. At the completion of the course, a participant will:

1. Know the sources of 'Public International Law';
2. Understand, at a basic level, the legal constraints on the use of force as an instrument of

national policy; and
3. Understand how nation states interact as members of international organizations.
Online, 5 hours

J3SN-MN104 Introduction To Hague And Geneva Law Course N/S/IP
This course is offered as a self-paced, non-assessed, introductory course to the topic of 'Hague' and 'Geneva' Law. It explores the legal issues concerning the 'Jus In Bello' aspects of warfare, that is the elements of 'Geneva Law' and 'Hague Law' which impinge upon and limit military operations. The four Geneva Conventions and the three Additional Protocols are addressed, as well as the concept and application of customary International Law (Jus Cogens).
The course aim is to introduce participants to Hague and Geneva Law. At the completion of the course, a participant will:
1   Be familiar with the basic history, background and sources of Hague and Geneva Law;
2   Have a basic understanding of the Jus in Bello aspects of international law; and
3   Be familiar with the main principles associated with Hague and Geneva Law.
Online, 5 hours

J3SN-MN105 Introduction To Rules Of Engagement (ROE) Course N/S/IP
This course is offered as a self-paced, non-assessed, introductory course to the topic of 'Rules of Engagement' (ROE). It introduces participants to the 'Jus in Bello' aspects of conflict. Here the importance of 'ROE', or those rules which limit the application of 'deadly force' will be discussed. Consideration will center on the affect that the National Policy of a Nation state has upon its military operations (Jus Ad Bellum).
The course aim is to introduce participants to 'Rules of Engagement'. At the completion of the course, a participant will:
1   Be aware of the national policy aspects of the application of deadly force;
2   Recognize the necessity for ROE; and
3   Understand the application of ROE.
Online, 5 hours

J3SN-MN106 Introduction to International Enforcement Mechanisms Course N/S/IP
This course is offered as a self-paced, non-assessed, introductory course to the topic of 'International Enforcement Mechanisms'. It introduces participants to those remedies available to Nation States, through their domestic courts and international tribunals, to seek redress on 'War Crimes', 'Crimes against Humanity', 'Genocide', and other international crimes. The two 'ad hoc' International Criminal Tribunals for the Former Yugoslavia and Rwanda/Burundi (ICTY/ICTR) will be discussed, as will the International Criminal Court (ICC) and those Special Courts and Tribunals covering international crimes in Iraq, Sierra Leone and Cambodia. Online, 5 hours

J3SN-MN174 Defence Against Terrorism - A Challenge for NATO and the International Community Course N/S/IP
This course provides an overview of the field of terrorism and its' Defence. The course aim is to offer a broad summary and generate discussion on terrorism. This ADL pre-learning course consists of five lessons:
1. Introduction to the History of Terrorism
2. Terrorists – Who are they?
3. How Terrorists Operate
4. The Threat of Terrorism
5. The Challenge of New Terrorist Actions and Their Impact on NATO
    Upon successfully completing the course, you will be able to:
*   Name the significant steps in the history of terrorism
*   Differentiate the meanings of the term 'terror' and 'terrorism'
*   Describe the way terrorists work
*   Name the challenge of the new terrorist
*   Explain the impact on NATO Online, 4 hours

J3SN-MN186 Human Trafficking: Causes and Consequences, Counter-Strategies Course N/S/IP
This course summarizes the history, causes, consequences, and civil and international security implications of human trafficking. It also identifies counter-strategies against human trafficking and how legislative measures and the prosecution of traffickers protect victims. Online, 3 hours

J3SN-US005 Joint Staff Business Processes (JSBP) Course N/S/IP
This course describes the Joint Staff structure and functions within the National Security Structure (NSS). It also explains the purpose and history of the Tank, as well as the mission of the Special Assistant for Joint Matters (SAJM). In addition, the course describes the various levels of deliberation within the National Security Council (NSC) system for developing and implementing US national security policy. Online, 3.5 hours

J3SN-US013-11 Joint Task Force Fundamentals Course (JTF 101) Module 11: Interagency Coordination N/S
Interagency Coordination module presents a fundamental understanding of interagency coordination to the Joint Force Commander (JFC) and staff in order to organize the joint task force and execute the mission in a manner which ensures unity of effort. Essential considerations are presented for coordination, cooperation, and teamwork among Other Government Agencies (OGAs) of the US Government (USG), Non-Governmental Organizations (NGOs), intergovernmental organizations (IGOs), and combatant commands involved in joint operations. Topics include interagency coordination, civil-military operations, and the role of the Civil Military Operations Center (CMOC) as an integration mechanism. Online, 2 hours

J3SN-US013-12 Joint Task Force Fundamentals Course (JTF 101) Module 12: Multinational Operations N/S
Multinational Operations module presents basic background information on multinational operations for a joint task force (JTF). Topics include fundamentals of joint operations, the focus of a JTF within this environment, and the initial challenges of executing JTF missions at the operational level. Online, 2 hours

J3SN-US013-15 Joint Task Force Fundamentals Course (JTF 101) Module 15: Introduction to Rules of Engagement (ROE) S
This web-based interactive module is designed to provide Joint Force Commanders (JFCs) and staffs participating in joint exercises and operations with a fundamental understanding of rules of engagement (ROE) and the crucial role ROE plays in crisis action planning for joint operations.

Note: *This module only available via SIPRNET, at the following address:*
http://www.jwfc.jfcom.smil.mil/jko/individual/jtf101/roeweb/index.html Online, 2 hours

J3ST-MN037 Bulgarian Participation in Peace Support Operations Course N/S/IP
This course provides basic information regarding Bulgaria's participation and experience in peace support operations. It also provides an understanding of the terms, acronyms and language typically used in peace support operations. The course content provider is the Rakovski Defence and Staff College. This web-based course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). It is offered here for informational purposes only, without accreditation or instructor interaction. Online, 2 hours

J3ST-MN042 Introduction to Environmental Awareness Course N/S/IP
This course presents Military Environmental Principles to be established for NATO and NATO-led military activities during peacetime and crises. The papers discussed in this module will clearly define the responsibility of the commanders of NATO units as well as commanders of units from Sending Nations (SNs) during the preparation and execution of military activities. It also covers

the responsibility for environmental protection principles and policies carried out in support of all NATO-led operations during peacetime, and crisis. Online, 2 hours

J3ST-MN044 Introduction to the UN Security Council Course N/S/IP
This course introduces the United Nations (UN) Security Council, its main responsibilities, functions, powers, structure, and other basic facts. The text is based on official information from the UN, including quotes from the UN Charter. The learning objectives include interactive elements, such as multiple choice and gap exercises, and a simulation of the voting rules. Online, 6 hours

J3ST-MN045 NATO Peace Support Operations Course N/S/IP
The course aim is to provide an orientation towards NATO–led Peace Support Operations (PSO), primarily at the operational level. By the end of the course you should have a common understanding of PSO within the Alliance and amongst its Partners, and you will be broadly familiar with the definitions, terminology and concepts which are employed. It serves both as a module for PSO pre-course attendance at NATO and PfP Education and Training Establishments, and as preparation for major exercises incorporating NATO doctrine. Online, 5 hours

J3ST-MN046 Peace Keeping Techniques Course N/S/IP
This course is primarily designed for the benefit of officers from Nations and Organizations participating in PSO, as well as, civilian officials undertaking national or international responsibilities in the field. This course contains one general introduction and twelve distinct modules. Each module consists of one or more lessons with specific learning objectives and exercises. This course is based on NORDCAPS PSO TACTICAL MANUAL VOLUME 2. The purpose of Volume II is to give all commanders, in particular from section leaders and up to company commanders, all the details they require at the beginning of a PSO assignment. This Online, course was created by the Finnish Defence Forces International Centre (FINCENT) and Ukrainian Cooperative Development Team at the International Research and Training Centre (IRTC) for Information Technologies and Systems. The course is also supported by International Relations and Security Network (ISN) in Zurich. Online, 3 hours

J3ST-MN048 UN Peace Support Operations Orientation Course N/S/IP
Completion of this course will prove extremely useful to personnel preparing for assignments in International Headquarters in Peace Support Operations (PSO). Students who successfully complete this foundation course will benefit more fully from residential PSO courses and exercises offered by National or International Institutions. Online, 10 hours

J3ST-MN049 National Security and Defence Strategy Course N/S/IP
The purpose of this course is to provide a basic understanding of the considerations surrounding National Security and Defence to senior Western Hemisphere military, national police and national security leaders to enable adequate analysis and strategic planning to prevent and solve crises of various natures that can affect the Defence and security of the "Nation-State." Online, 20 hours

J3ST-MN050 National Security and Defence Strategy (Spanish) Course N/S/IP
The objective of this course is to provide a basic understanding of the considerations surrounding National Security and Defence to senior Western Hemisphere military, national police and national security leaders to enable adequate analysis and strategic planning to prevent and solve crises of various natures that can affect the Defence and security of the "Nation-State." Online, 20 hours

J3ST-MN051 National Security and Defence Strategy (Portuguese) Course N/S/IP
The objective of this course is to provide a basic understanding of the considerations surrounding National Security and Defence to senior Western Hemisphere military, national police and

national security leaders to enable adequate analysis and strategic planning to prevent and solve crises of various natures that can affect the Defence and security of the "Nation-State."
Online, 20 hours

J3ST-MN052 The Inter-American System Course N/S/IP
This course explores the origins and development of the Inter-American System. It begins with an overview of the factors that led to the system's creation, then discusses in detail, the mission and structure of the new institutional order established for the Inter-American system under the Charter of the Organization of American States in 1948, and ends with focus on specific objectives and methods in the education, science, and technology sectors of the Americas. Online, 20 hours

J3ST-MN053 International Security Risks (Drugs, Migration, Climate, Finances, Terrorism) Course N/S/IP
This course consists of various modules, each one of which deals with a different international security risk such as cyber warfare, migration, drug trafficking, instability on financial markets, and the destruction of the environment. The modules discuss links between security, risk, and the phenomena in question and present overviews of the main problems and counterstrategies as developed and implemented by states and international organizations. Interactive elements allow students to evaluate the issues involved and to devise strategies for dealing with the risks. The aim of this course is to make students familiar with theoretical concepts that are important for understanding the link between security and risk in general and the various topics discussed in the course in particular. Apart from those objectives concerning theory, students will gain insights into the empirical dimensions of several international phenomena. By showing that risks are to a certain extent constructed and that this construction does not necessarily reflect 'objective reality', students learn to question their own perceptions and that of others. This capacity, in turn, permits students to weigh the pros and cons of various risk policies and to propose their own strategies. Online, 4 hours

J3ST-MN054 Overview of the Inter-American System Course N/S/IP
This course explores the origins and development of the Inter-American System. It begins with an overview of the factors that led to the system's creation, then discusses in detail, the mission and structure of the new institutional order established for the Inter-American system under the Charter of the Organization of American States in 1948, and ends with focus on specific objectives and methods in the education, science, and technology sectors of the Americas. Online, 20 hours

J3ST-MN055 SPIRIT: Security Policy, International Relations, and Information Technology Course N/S/IP
This course addresses the relationship between international politics and modern information technologies. It also provides a basic knowledge in Internet search tools and techniques. The course content provider is the International Relations and Security Network for Switzerland. This web-based course uses the Partnership for Peace (PfP) Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). It is offered here for informational purposes only, without accreditation or instructor interaction. Online, 4 hours

J3ST-MN056 The Interagency Process Course N/S/IP
This course provides a look at complex emergencies, political-military planning, the mechanics of inter-agency coordination at the national (executive) level and best practices for facilitating collaboration among multiple government and non-government agencies and the military. It also provides insight into the needs of policymakers in crisis situations, as well as the interagency mechanisms and processes. Other topics include international considerations such as coalition-building. Online, 20 hours

J3ST-MN057 Introduction to Information Operations Course N/S/IP

This module intends to highlight the rapidly evolving situations where military operations are affected by media and public perceptions. At the conclusion of this module, you will be able to discuss the following INFO OPS topics: 1. Fundamentals; 2. Roles and Structure; 3. INTEL Support; 4. Coordination Requirements; and 5. Planning. Online, 3 hours

J3ST-MN058 Information Security Fundamentals Course N/S/IP
This course is an updated and expanded e-learning version of the Information Security Fundamentals seminar held by ISN on 25-27 August 2003 in Zurich and co-developed with Danielyan Consulting LLP. The course also provides a list of information security qualifications for those who would like to continue their information security education and a list of information security resources on the World Wide Web. Online, 2 hours

J3ST-MN059 Fundamentals of CBRN Defence Course N/S/IP
This course discusses: the history of chemical and biological warfare; characteristics and effects of various nuclear and radiological weapons; characteristics and effects of biological agents; Weapons of Mass Destruction (WMDs) and Nuclear Biological and Chemical (NBC) risks to NATO. The purpose of the Fundamentals of Chemical, Biological, Radiological, Nuclear, (CBRN) Defence course is to provide an overview of the history, characteristics, and effects of CBRN warfare. After completing the module, you will know the impact of CBRN warfare, and the various initiatives of weapons of mass destruction. Online, 2 hours

J3ST-MN069 Introduction to NATO Course N/S/IP
The purpose of this course is to provide an introduction to NATO structures, policies and operations, as well as an overview of the current issues facing the Alliance. The course is primarily designed for the benefit of newly appointed regular and reserve officers from NATO and Partner Countries and civilian officials taking up national or international responsibilities in the security field. Course content contributors include NATO Defence College, the United States National Defence University, the NATO School, and Headquarters, NATO Office of Information and Press. Modules include: NATO Overview; History and Evolution of the Alliance; Evolution of NATO Strategy; NATO Structures and Decision Making & Key Political Issues. This web-based course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). It is offered here for informational purposes only, without accreditation or instructor interaction. Online, 11 hours

J3ST-MN075 CIMIC Overview for NATO School Course N/S/IP
This module will provide you with the basic knowledge of civil military cooperation (CIMIC) in NATO. Online, 2 hours

J3ST-MN077 Multinational Crisis Management Course N/S/IP
The purpose of the Multinational Crisis Management Course is to introduce:
1. The Concept of Crisis Management
2. NATO Crisis Management Process (Organization, Systems, and Procedures)
3. NATO's Cooperation & Partnership with International Organizations and Non-NATO Nations.
Students who complete this foundation course will acquire the level of knowledge and understanding of Political, Military and Civil aspects of Crisis Management, and the role, functions and relations of NATO in Crisis Management.
The course is primarily designed for military/civilian officers of NATO, PfP and Mediterranean Dialogue Nations assigned to:
1. A NATO HQ or Agency
2. A Force assigned or earmarked to NATO
3. National HQs (Ministry of Defence, Foreign Affairs, General Staff or subordinate HQs), which fulfills Crisis Management functions in conjunction with NATO HQs. Online, 3 hours

J3ST-MN082 NATO/Partner Operational Staff Officer's Course N/S/IP

This module prepares NATO and Partner officers to function at an entry level in a NATO- led, multinational Headquarters for the purpose of conducting Peace Support Operations.
Online, 2 hours

J3ST-MN085 NATO School Force Enhancement from Space Course N/S/IP
This course will discuss the basic systems involved in Force Enhancement from Space, and the advantages that these systems provide, both to NATO and potentially to NATO's adversaries. At the conclusion of this course one will be able to discuss the following topics: 1. Introduction to Force Enhancement from Space - This introductory lesson provides an overview three ways that NATO uses space for military operations.; 2. Communications - This lesson discusses the way space based communication systems are applied in NATO operations.; and 3. Navigation and Positioning - This lesson describes the navigation and positioning of satellites in orbit. Navigation and Positioning is one of the most important elements in Satellite Communications.
Online, 1 hour

J3ST-MN086 NATO Space Support Course N/S/IP
This lesson discusses in detail the 4 areas of Space Support outlined in Allied Joint Publication 3.3 (AJP 3.3): spacelift operations, satellite operations, space surveillance, and the space environment. Online, 4 hours

J3ST-MN092 European Security and Defence Policy Course N/S/IP
This course provides an introduction into the European Security and Defence Policy (ESDP). It discusses the most important aspects of and questions related to ESDP. This includes an overview of the history of ESDP, European Union (EU) institutions concerned with implementing ESDP, EU civilian and military capabilities, the relationship between the EU and NATO, and EU operations carried out within the framework of ESDP. The last lesson provides a glimpse into the future and discusses some of the most important current and future challenges to ESDP.
Online, 6 hours

J3ST-MN099 Peace Support Operations for Battlegroup CIMIC Officers Course N/S/IP
This orientation course is intended for Battlegroup CIMIC (Civil-Military Cooperation) officers. It focuses on working procedures connected with implementing CIMIC functions and provides detailed hands-on knowledge level training. Students who successfully complete this foundation course will benefit by having the basic knowledge on performing the duties of a Battlegroup CIMIC staff member. Online, 2 hours

J3ST-MN100 Peace Support Operations Civil Military Cooperation for Senior Commanders and Senior Staff Course N/S/IP
This orientation course provides an overall description of recent developments within PSO (Peace Support Operations), with a focus on CIMIC (Civil Military Cooperation) duties and functions. The CIMIC concept, like other military disciplines will therefore consistently be subject to continual development and adaptation as new experiences are gained. Students who successfully complete this foundation course will benefit by having the current and basic knowledge for understanding the primary objectives of CIMIC work. Online, 2 hours

J3ST-MN101 The Interagency Process (Spanish) Course N/S/IP
This course provides a look at complex emergencies, political-military planning, the mechanics of inter-agency coordination at the national (executive) level and best practices for facilitating collaboration among multiple government and non-government agencies and the military. It also provides insight into the needs of policymakers in crisis situations, as well as the interagency mechanisms and processes. Other topics include international considerations such as coalition-building. Online, 20 hours

J3ST-MN102 Peace Support Operations Civil Military Cooperation for Commanders and Staff Course N/S/IP

This orientation course is intended for all CIMIC (Civil-Military Cooperation) personnel except Senior Commanders and Senior Staff. It details the main CIMIC duties focusing on: Operational Phases, Functional Areas and Primary duties. It also describes the work involved for planning within the Staff. Students who successfully complete this foundation course will benefit by having the basic knowledge for understanding CIMIC staff functions. Online, 2 hours

J3ST-MN107 The Interagency Process (Portuguese) Course N/S/IP
This course provides a look at complex emergencies, political-military planning, the mechanics of inter-agency coordination at the national (executive) level and best practices for facilitating collaboration among multiple government and non-government agencies and the military. It also provides insight into the needs of policymakers in crisis situations, as well as the interagency mechanisms and processes. Other topics include international considerations such as coalition-building. Online, 20 hours

J3ST-MN108 The Inter-American System (Spanish) Course N/S/IP
This course explores the origins and development of the Inter-American System. It begins with an overview of the factors that led to the system's creation, then discusses in detail, the mission and structure of the new institutional order established for the Inter-American system under the Charter of the Organization of American States in 1948, and ends with focus on specific objectives and methods in the education, science, and technology sectors of the Americas. Online, 20 hours

J3ST-MN109 The Inter-American System (Portuguese) Course N/S/IP
This course explores the origins and development of the Inter-American System. It begins with an overview of the factors that led to the system's creation, then discusses in detail, the mission and structure of the new institutional order established for the Inter-American system under the Charter of the Organization of American States in 1948, and ends with focus on specific objectives and methods in the education, science, and technology sectors of the Americas. Online, 20 hours

J3ST-MN168 Introduction to NATO Force Protection Course N/S/IP
This course provides an overview of the fundamentals of NATO Force Protection (FP). In addition, the course discusses the NATO FP process and the FP command and control responsibilities. Furthermore, it addresses NATO's FP planning considerations and offers a short lexicon on FP acronyms and abbreviations, as well as a brief overview of NATO FP terms and definitions. The course closes with a list of NATO reference publications relevant to the field of force protection. Online, 2 hours

J3ST-MN170 Arms Control and Arms Control Agreements Course N/S/IP
This course will provide a general overview of arms control and arms control agreements. The course will discuss basic facts of arms control history, basic arms control agreements, and analyze the impact of these agreements on NATO and PfP countries.
At the conclusion of this course, students will able to:
1   State the basics of arms control history
2   Define NATO's role in the arms control process
3   Describe the Vienna Document 1999 and the other Organization for Security and Co-operation in Europe (OSCE) arms control agreements
4   Analyze the impact of arms control agreements on NATO operations and the international political system
5   Evaluate the impact of single arms control agreements as a process and as a treaty in the arms control process
Online, 4 hours

J3ST-MN187 Critical Infrastructure Awareness (CIA) Course N/S/IP
This course was developed for senior civil and military personnel ranging from the Staff College Major to the War College Colonel and their civilian equivalents.

Students will learn about current and prospective strategic level issues related to critical infrastructure protection (CIP) and have a greater appreciation of the fundamental elements and complexity of CIP in relation to national and global security concerns. Implementing CIP requires the acceptance by senior management, military or otherwise, that greater cooperation between government and private owners and operators is necessary if protective measures are to be successfully implemented. Online, 3 hours

J3ST-US006 Introduction to Defense Distribution Course N/S/IP
This is a web-based course designed to provide broad understanding of Defense transportation/distribution processes including the vision, mission, and components of United States Transportation Command (USTRANSCOM), different types of planning processes, and the capabilities that facilitate Total Asset Visibility (TAV). Online, 2 hours

J3ST-US009 Homeland Security and Defense (HSD) Course N/S/IP
This is a web-based course designed to provide basic background knowledge and comprehension of key joint Homeland and Security Defense (HSD) subject matter to prepare individuals assigned as members of Joint Task Force (JTF) Headquarters staffs to more effectively accomplish their assigned tasks during joint exercises and real-world operations. Online, 20 hours

J3ST-US010 Defense Support of Civil Authorities (DSCA) Course N/S/IP
This course provides an overview of the DSCA organization, structure, and mission areas. It describes how DSCA fits into the missions of homeland security (HLS) and homeland Defense (HLD) and describes how the USNORTHCOM and North American Aerospace Defense Command (NORAD) are structured in support of HLS and HLD missions to provide civil support (CS). Online, 5 hours

J3ST-US026 Joint Special Operations Task Force (JSOTF) (v.2.0) Course N/S/IP
The Joint Special Operations Task Force (JSOTF) Level I Course is a self-paced, interactive computer based training course developed by the Special Operations Command Joint Forces Command (SOCJFCOM). This knowledge-level instruction is designed for an individual assigned to a JSOTF HQ who is Service specialty or branch qualified, but is not necessarily joint or SOF qualified or experienced. Learning objectives focus on basic joint doctrine, SOF command and control (C2) structures and the joint operational planning process. The course also provides information on specific functional areas of a JSOTF staff and basic knowledge of SOF component commands, to include their missions, capabilities and limitations.
At the completion of this course, the JSOTF HQ staff member will have a working knowledge of their functional area and a basic understanding of joint doctrine. Ideally, an individual should complete Level I instruction prior to being assigned to a theater special operations command (TSOC) or JSOTF. The training audience includes all staff officers and Non-commissioned Officers (NCOs), including active component and reserve component augmentees, who may serve in a JSOTF HQ, or who are enroute to or assigned to a TSOC, as well as DOD civilian and contract personnel, or other personnel who serve as enablers to a JSOTF or TSOC.
Online, 19 hours

J3ST-US118 Ballistic Missile Defense Basic Course N/S
The purpose of this course is to provide a fundamental understanding of the Ballistic Missile Defense System (BMDS). All course content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Online, 2.5 hour

J3ST-US121 Nuclear Emergency Team Operations (NETOP) Primer Course *FOUO* N/S
The purpose of this course is to help provide training for members of a nuclear emergency response team. The subject matter includes modules on the biological effects of radiation, response processes and capabilities, radiation detection equipment, contamination control stations, surveys, and command and control. Online, 8 hours

J3ST-US122 Nuclear Accident Response Overview (NARO) Course *FOUO* N/S
The purpose of this course is to present the problems and responsibilities involved in nuclear weapons accident responses. The course content includes: lessons learned from past accidents; federal, state, and local agency responsibilities; and key issues specific to a nuclear weapons accident (i.e., media, medical, and hazards management issues). All content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Online, 7 hours

J3ST-US171 USFK Theater Specific Required Training Course N/S/IP
This United States Forces Korea (USFK) Regulation 350-2 course establishes theater specific required training that every individual, service member or civilian employee, must complete prior to arrival in the Republic of Korea (ROK) to ensure they conduct themselves in a manner that is compatible and respectful of the culture and laws of the ROK. All personnel deploying to Korea must complete this training and adhere to the video, USFK policy letters and other information provided in this course. This training must be completed annually. Online, 9 hours

J3ST-US171-SA1 USFK Civilian Equal Employment Opportunity and Military Equal Opportunity Programs Course N/S/IP
This course is offered as an orientation to, and provided as an overview for civilians and military workforce in the Department of Defense. The purpose is to contribute to readiness by supporting and improving DoD civilian equal employment opportunity/affirmative employment program (EEO/AEP) and military equal opportunity/affirmative action plan (EO/AAP) goals and objectives. This training must be completed semi-annually. Online, 0.5 hours

J3ST-US171-SA2 USFK Awareness Training for Combating Trafficking in Persons and Prostitution Course N/S/IP
This course is provided to increase awareness of the global issue of Trafficking in Persons. It describes what human trafficking is, the close relationship between prostitution and human trafficking, USFK policies, legal aspects, military service core values, USFK standards of conduct, off-limits areas, indicators of human trafficking and prostitution, health implications, and reporting procedures. This training must be completed semi-annually. Online, .5 hours

J3ST-US211 Base Populace Awareness Course IP
This course provides an overview of the different types of Chemical, Biological, Radiological, and Nuclear (CBRN) threats, information on how to prepare for a CBRN threat, and instructions on the protective measures to take for each type of threat. Online, 3 hours

J3ST-US287 Readiness Assessment System Output Tool (RAS OT) S
The purpose of this course is to provide students with a working knowledge of the capabilities of the Readiness Assessment System Output Tool (RAS OT) to include: Analyzing and Assessing Readiness Data, and using Pre-defined Queries to create summary graphs in external applications. This course is essential for any student or action officer who needs to know unit readiness information for use in a planning or operational environment at any combatant command, joint task force, or senior service headquarters. Online, 2 hours

J3ST-US336 Pre-Command Safety Course N/S/IP
The purpose of this course is to provide situational awareness of safety programs, operational processes an incident reporting procedures for Special Operations Forces (SOF). This course will meet mission needs and service specific safety program requirements. Online, 3 hours

J3TA-MN068 Map Reading Course N/S/IP
This Swedish Armed Forces International (SWEDINT) Map Reading Course has been created by SWEDINT and developed in the PfP Consortium's Learning Management System (PfP LMS) by the Swedish Cooperative Development Team (CDT). The purpose of this course is to provide an

introduction to Map reading with focus on handling Universal Transverse Mercator (UTM) and Military Grid Reference System (MGRS) Co-ordinate system. Online, 3 hours

J3TA-US014 Introduction to Joint Nonlethal Attack Electronic Warfare (EW), and Suppression of Enemy Air Defenses Course (SEAD) *FOUO* N/S
This course provides basic background knowledge and comprehension of Joint Nonlethal Attack, Electronic Warfare (EW), and Suppression of Enemy Air Defenses (SEAD), including: Nonlethal Attack and EW Fundamentals, Electronic Attack (ES) and Electronic Protection (EP) Fundamentals, Electronic Warfare Support (ES) Fundamentals, SEAD and Integrated Air Defense Systems (IADS), SEAD Execution Categories and Means, and SEAD Roles and Missions. The course will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during joint events, joint exercises, and real-world operations. Online, 6 hours

J3TA-US015 Introduction to Battlespace Maneuver with Integrated Firepower Course N/S/IP
This course provides basic background knowledge and comprehension of Joint Battlespace Maneuver with Integrated Firepower, including: The Relationship Between Maneuver and Firepower (Fires), Joint Maneuver Capabilities, Firepower Capabilities, Maneuver and Fires Integration and Interdependence, and Joint Command and Control (C2) Coordination Elements. The course will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during joint events, joint exercises, and real-world operations. Online, 6 hours

J3TA-US016 Introduction to Joint Interdiction Operations Course *FOUO* N/S
This course provides basic background knowledge and comprehension of Joint Interdiction Operation, including: Fundamentals of Interdiction, Joint Interdiction Capabilities, Joint Interdiction Planning, and Joint Interdiction Execution and Assessment. The course will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during joint events, joint exercises, and real-world operations. Online, 2 hours

J3TA-US022 SERE 100, Code of Conduct Training Course N/S
This course provides knowledge on how to use the code of conduct should isolation occur and how to return honorably to friendly forces. It explains the various types of captivity and the actions captors use to exploit captives. Also, the course describes the psychological aspects of captivity and captivity resolution. Online 2 hours

J3TA-US030 Combating Trafficking in Persons Course N/S/IP
The purpose of this course is to describe the realities of Trafficking in Persons (TIP), which capitalizes on human misery and exploitation. The course is intended to increase awareness of TIP and to help serve to end it. Online, 1 hour

J3TA-US032 M9 Pistol Training Course N/S
The course provides personnel with limited weapons training experience, additional or refresher training prior to live fire qualification. Online, 1 hour

J3TA-US033 M163A Service Rifle Training Course N/S
This course provides personnel with limited weapons training experience additional or refresher training prior to live fire qualification. Online, 1 hour

J4OP-US013-07 Joint Task Force Fundamentals Course (JTF 101) Module 7: Joint Logistics N/S
Joint Logistics module provides the fundamentals of joint logistics and essential planning and employment considerations to a joint force commander (JFC) and staff. This module presents key logistics principles and policies and focuses on actions a JFC can take to ensure logistics fully supports the concept of operations. Online, 1.5 hours

J4OP-US013-08 Joint Task Force Fundamentals Course (JTF 101) Module 8: Joint Reception, Staging, Onward Movement, & Integration (JRSOI) N/S

Joint Reception, Staging, Onward Movement, and Integration (JRSOI) module provides the fundamentals of joint reception, staging, onward movement, and integration (JRSOI) to a joint force commander (JFC) and staff. This module identifies and defines key JRSOI principles and elements, focuses on keys and challenges during each step of the process, and highlights force closure. Online, 1 hour

J4OP-US013-17 Joint Task Force Fundamentals Course (JTF 101) Module 17: Introduction to the Role of the Joint Task Force Surgeon N/S

The Introduction to the Role of the Joint Task Force Surgeon module of the JTF 101 course is intended to teach the roles and responsibilities of the joint task force surgeon (JTFS) and staff.

This module presents a general overview of the role of a JTFS and staff within a JTF headquarters (HQ). Lack of training, prior to selection and deployment, has resulted in inadequate or ineffective advice to the JTF Command resulting in an inability to complete the assigned mission. All content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Curriculum content also includes lessons learned from previous deployments of individuals selected to serve on a JTF Staff. Online, 8 hours

J4OP-US096 Joint Medical Patient Movement Items Tracking and Visibility Course *FOUO* N/S

The Patient Movement Items (PMI) tracking and visibility system is a joint capability solution designed to effectively supply and re-supply DoD Medical Treatment Facilities (MTFs) with transportable medical equipment even during times of rapid deployment. PMI consists of specifically designated medical equipment needed for patient transport, and the consumable supplies needed for their proper use. The PMI tracking and visibility system ensures that MTFs do not face a shortage of vital equipment as a result of allowing that equipment to be attached to outbound patients. This course provides background information on the development of and need for a worldwide PMI tracking capability. The course will provide DoD, governmental and non-governmental personnel an understanding of how the PMI tracking system works. The course will also provide instruction and practical experiences using the hardware and software of the PMI system. The course consists of three lessons. All content is based on US Joint Doctrine, US Air Force publications, and owner's guides for the relevant hardware and software. Online, 1 hour

J4OP-US116 Joint Deployment Distribution Operations Center (JDDOC) Course N/S

The course is designed for DoD, governmental and non-governmental personnel who will be assigned to and/or working with a JDDOC. This course will provide personnel the understanding that the JDDOC is a joint capability solution designed to satisfy the requirement to integrate strategic and theater deployment execution and distribution operations within each Geographic Combatant Commander's Area of Responsibility (AOR). The JDDOC, under the control, direction and auspices of the Geographic Combatant Commander, directs, coordinates and synchronizes assigned and attached forces' deployment and redeployment execution, and distribution operations (and other authorities specified by the Combatant Commander) to enhance the Combatant Commander's ability to execute logistics plans with National Partner (NP) support. The course consists of ten modules. All content is based on US Joint Doctrine, enhanced with examples, lessons learned, reference citations, and hyperlinks for additional research and information. Online, 17 hours

J4OP-US129 Health and Medical Aspects of Stability Operations (HMASO) Course N/S

This course is designed to introduce military medical mid-level officers and enlisted personnel to the complex requirements of health service support to Security, Stability, Transition, and Reconstruction Operations that will be conducted in Complex Humanitarian Emergencies, Humanitarian Assistance, Disaster Response, and situations involving different degrees and types of conflict. It is designed for field application and as basic knowledge for all military health

professionals. It will help military medical personnel in the understanding of international relief requirements in complex emergencies and help DoD personnel to contribute or develop Stability Operations skills by creating an understanding of other United States Government (USG) gencies and international organizations and the joint doctrine of Stability Operations. Online, 11 hours

J4OP-US143 The Joint Task Force – Port Opening Course N
This course describes operating concepts for a joint capability resulting from the organization of Army and Air Force Service elements and also addresses training, readiness, logistics, command, control and communications for the task force. A single JTF-PO capability to support APOD operations reached a CDR USTRANSCOM approved Initial Operational Capability (IOC) on 2 November 2006. A separate Concept of Operations will address JTF-PO Seaport of Debarkation (SPOD) operational concepts. The course consists of four modules. All content is based on US Joint Doctrine. Online, 5 hours

J4OP-US184 Basic Medical Ethics and Detainee Health Care Operation Course N/S/IP
The purpose of this course is to equip all personnel who may provide health care to detainees to be familiar with DoD policy regarding detainee operations and have the skills and knowledge to implement that policy. It is also the intent of this course that all medical personnel who may observe or examine detainees and detainee operations be able to recognize possible abuse of detainees and take appropriate steps to report it, even if they are not themselves rendering care to the detainees. Online, 10 hours

J4OP-US302 Overview of VPP Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses historical background for VPP, defines the Star and Merit programs and identifies key benefits of VPP. Online, 0.5 hour

J4OP-US310 Conducting Safety and Health Training Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses training program requirements for managers, supervisors, and employees, e.g. training on use of PPE, emergency evacuations, new employee training, etc. Online, 0.5 hour

J4OP-US311 Contractor Safety Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses protecting all workers affected by contract operations, describes contractor selection, and identifies employee/employer responsibilities. Online, 0.5 hour

J4OP-US312 DoD Safety and Occupational Health Program Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course identifies regulatory requirements for the DoD Safety and Health program. Online, 0.5 hour

J4OP-US313 History and Trend Analysis Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses trend analysis, root cause, countermeasures and cost benefit analysis. Online, 0.5 hour

J4OP-US314 How to Form and Manage a Safety Committee Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses the basic function of safety committees and who should serve on Safety Committees. Online, 0.5 hour

J4OP-US315 Job Safety Analysis Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses reasons for conducting a Job Safety Analysis (JSA), how to address hazards using the JSA and the JSA review process. Online, 0.5 hour

J4OP-US316 Mishap Investigation and Reporting Course N/S
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses what constitutes a mishap, requirements for reporting, immediate response procedures, and how to conduct a mishap investigation. Online, 0.5 hour

J4OP-US317 OSHA Recordkeeping and North American Industry Classification System (NAICS) Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses requirements for recording and reporting occupational injuries and illnesses and application requirements for NAICS codes. Online, 0.5 hour

J4OP-US318 Safety and Health Program Evaluation Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses the purpose for conducting the annual evaluation and how to report findings in a concise format. Online, 1 hour

J4OP-US319 Sports Safety Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses preventing injuries during recreational and sporting activities. It describes types of sports injuries, recognizing the difference between an acute and a chronic injury, and what to do if injured. Online, 0.5

J4OP-US320 VPP 101 Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses the purpose of VPP and identifies employee roles and responsibilities in relationship to the major tenets of VPP. Online, 1 hour

J4OP-US321 Voluntary Protection Program (VPP) for Industrial Hygiene/Bioenvironmental and Occupational Health Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses the role of Industrial Hygiene/Bioenvironmental and Occupational Health Programs in regards to VPP issues. Online, 0.5 hour

J4OP-US322 Workplace Safety and Health Inspections Course N/S/IP
The purpose of this course is to provide education and training on Voluntary Protection Program (VPP) and Occupational Safety and Health programs. This course discusses identifying workplace hazards, identifying control measures and requirements of the inspection process. Online, 0.5 hour

J4SN-US013-06 Joint Task Force Fundamentals Course (JTF 101) Module 6: JTF Transition and Redeployment Operations N/S
JTF Transition and Redeployment Operations module presents planning principles and components of joint task force (JTF) transition and redeployment operations. This module examines JTF transition and redeployment challenges, issues, and planning considerations, as well as the relationship of transition and redeployment operations to the overall JTF campaign. Online, 2 hours

J4SN-US270 Joint Deployment and Distribution Performance Metrics Framework for Sustainment Distribution (JDDE PMFSD) Course N/S/IP
The purpose of this course is to improve Joint readiness by driving the unity of effort needed to achieve identified levels of performance and flexibility in support of the Warfighter. It provides baseline and target levels for JDDE performance in speed, reliability, efficiency, and information visibility. All course content is based upon US Joint Doctrine and Joint Tactics, Techniques and Procedures (JTTP) enhanced with examples, lessons learned, and reference citations/hyperlinks for additional research and information. Online, 2 hours

J4ST-MN078 NATO Logistics Course N/S/IP
The aim of this module is to serve as an overview of NATO Logistics in doctrinal terms so that students have a thorough understanding of the Multinational Joint Logistics Center (MJLC) and its roles and functions together with Allied Joint Publication 4.6(A). It was designed for nucleus staffs, augmentees, and those individuals who may have to operate with an MJLC. This module provides an overview of the command, control and execution of multinational logistic support for deployed forces; promotes understanding of the interdependency of the deployed Joint Force Headquarters, Combatant Command Headquarters, and national logistic support arrangements; explains the role of the MJLC; and discusses practical logistic issues that effect operations. Online, 5 hours

J4ST-MN079 NATO Major Incident Medical Management Course N/S/IP
The core text has been prepared to provide an internationally recognizable approach to major incident management, with principles that are applicable in the civilian and military environments. For the military, a single Annex has been devised with a generic approach applicable to NATO and PFP Allies. Online, 3 hours

J4ST-MN081 NATO/Partner Joint Medical Planners Course N/S/IP
JMPC training is aimed at beginning-level medical planners or those assigned into future billets as NATO medical planners on the more tactical or operational levels. It provides those basic planning tools you will need in your job, and is designed to prepare you for the more in-depth JMPC training (course # M9-79) at the NATO School Oberammergau (NSO). Online, 2 hours

J4ST-MN083 NATO/Partner Senior Medical Staff Officer's Course N/S/IP
SMSOC training is aimed at senior-level medical planners or those assigned into future posts as NATO Medical Advisors on the tactical or operational levels. It provides those basic planning tools you will need in your job and is designed to prepare you for the more in-depth SMSOC training (Course M9-86) at the NATO School (Oberammergau). It is highly recommended that you attend the Joint Medical Planners' Course (JMPC) training (NSO course # M9-79) before attending the SMSOC. Online, 2 hours

J4ST-MN084 NATO's Reserve Forces Course N/S/IP
This module provides operational information to all Reserve Officers. It contains relevant links, documents and explanations to understand the role of Reserve Officers in the NATO structure. This module presents the various roles, missions and doctrines of Reserve Forces throughout the Alliance and surveys how the Alliance integrates Reserve Forces in current Operations. At the conclusion of this module, you will be able to discuss the following topics: 1. NATO Policy of Reserve Officers; and 2. Interallied Confederation of Reserve Officers. Online, 2 hours

J4ST-MN090 Resource Management in NATO Course N/S/IP
This course is included as an orientation to the Resource Management Education Programme and NATO School in Oberammergau, Germany. The aim of the Resource Management course is to provide an overview of the global requirement process, through the Defence Requirements Review (as part of Defence Planning); to present an overview of the resource management process via the concept of the three NATO resources assets, Military Budget (MB), NATO Security Investment Programme (NSIP) and Manpower. Online, 2 hours

Courses and Information Resources

J5OP-US001 Joint Operations Planning and Execution System (JOPES) Course N/S/IP
The purpose of this course is to provide users with information on the importance of the JOPES to the warfighter -- emphasizing the basic parts of the system and how it enhances the planning process. The course also provides an overview of the publications (policies), deliberate and crisis action planning process, as well as the use of the JOPES in that process. In addition, the user will receive information on the communications technology, Information Technology (IT) tools and applications, and the basics of Time Phased Force Deployment Data (TPFFD). Online, 6 hours

J5OP-US350 JOPES Refresher Course S
The purpose of this course is to provide remote training to maintain or regain proficiency with the Joint Operation Planning and Execution System (JOPES). JOPES is DoD's principal means for translating national security policy decisions into military plans and operations. JOPES Refresher provides a requested and required tool to ensure JOPES operators around the world are proficient on the latest capabilities, policies, doctrine, and functionalities of the system.
Online, 2 hours

J5OP-US351 JOPES Overview Course S
The purpose of this course is to provide an overview of the Joint Operation Planning and Execution System (JOPES). The JOPES Overview tackles the foundational items, such as the driving policies, procedures, and personnel, but maintains primary focus on the GCCS-J programs that are designed to assist with the JOPES process. This course also provides perspective prior to functional application training. Online 2 hours

J5OP-US353 Readiness Assessment System – Input Tool (RAS-IT) Course S
The purpose of this course is to provide accessible training on RAS IT previously only resided on JDTC's SIPR web site. With this training, force sourcing commands will be able to effectively utilize a readiness assessment tool to accurately assign joint forces prepared to support real world, exercise, and training operations. Online, 2 hours

J5ST-MN080 NATO Operational Planning Process Course N/S/IP
This course aims to provide candidates with basic knowledge of the NATO OPP process. The course offers an orientation to several operational courses taught at the NATO School in Oberammergau. Online, 4 hours

J6OP-MN064 Conducting a Computer Assisted Exercise Course N/S/IP
This course provides an overview of the organizational structure, tools, and processes needed to execute a Computer Assisted Exercise (CAX). It focuses on the conducting, analysis and reporting phases of the military exercise process. Online, 4 hours

J6OP-MN065 English Skills for Staff Officers II (ESSO 2) Course N/S/IP
The purpose of this on-line multimedia course is to engage officers in language learning and to facilitate the language learning process by the use of modern technologies. The course is primarily intended for self study and may be followed or accompanied by the instructor-led activities either in a classroom or on-line. It is expected that the course will be used by officers to prepare for their classroom training sessions, as an instrument for helping to keep language skills current, and as a reference book containing templates, examples and guidelines for applying their writing and speaking skills. Implementation is based on the PfP LMS authoring with provisions for accessibility of multimedia elements, including animations and audio fragments. This web-based course uses the PfP Consortium of Defence Academies and Security Studies Institutes Learning Management System (PfP LMS). It is offered here for informational purposes only, without accreditation or instructor interaction. Online, 8 hours

J6OP-MN073 Introduction to Satellite Operations Course N/S/IP
This course is an introduction to satellite operations focused on the physical behavior of satellites in space. The course uses pictures, animations, links to other websites, and narratives in non-

technical terms to accomplish the course objectives. Upon completion of this course, you will be able to:
1   List and describe basic satellite subsystems.
2   Recall basic principals and laws of satellite orbits.
3   Explain basic terminology used to describe satellite orbits.
4   Explain the advantages and disadvantages of different satellite orbits.
5   Summarize how different orbits are employed in support of military operations.
6   List and describe the major orbital perturbations.
Online, 6 hours

J6OP-US004 Global Command and Control System - Joint (GCCS-J) Course N/S/IP
This is a web-based course designed to provide a basic explanation of GCCS-J and its evolution. In addition, learners are provided with the Command, Control, Communications, Computers, and Intelligence for The Warrior (C4IFTW) concept and a basic overview of Command, Control, Communications, and Computers (C4) Systems supported by GCCS-J. This course also provides an overview of the system capabilities associated with the mission and functional areas as well as the basic infrastructure, software, and hardware of GCCS-J. Furthermore, the future technological advances to the GCCS-J System and how they will fit into the Joint Command and Control (JC2) and Deployable Joint Command and Control (DJC2) concept are described. Online, 2 hours

J6OP-US007 Joint Information Operations Orientation Course (JIOOC) *FOUO* N/S
The purpose of this course is to educate and train US Government personnel in the military grades of Lieutenant/Captain (O-3) to Captain/Colonel (O-6) and civilian equivalents in information operations (IO), with a primary emphasis at the combatant command level. Specifically, the course focuses on teaching joint IO doctrine and current DoD IO policy guidance as they apply to the operational level of joint warfare. Students also receive a foundation for duty as joint IO officers. This course is particularly relevant to those serving in IO cells and in staff positions in operations, communications, intelligence, and planning. Online, 18 hours

J6OP-US008 Joint Communication Systems Planners Course N/S/IP
To provide background knowledge and comprehension of planning, operation, and safeguarding of communications networks and to coordinate and supervise installation of a robust protected joint task force communications networks, and to prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during Joint National Training Capability (JNTC) events, other joint exercises, and real-world operations. Online, 5 hours

The following links are modules within this course that you can take separately.

J6OP-US008-1 Joint Communication Systems Planners Course Module 1: Introduction to Communications Modeling and Simulation N/S/IP
This module provides basic background knowledge and comprehension of key Communications Modeling and Simulation tasks. The module will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during Joint National Training Capability events, other joint exercises, and real-world operations. The module consists of a series of lessons on Joint Task Force (JTF) operations-related joint tasks. All content is based on US Joint Doctrine, enhanced with examples, lessons learned, reference citations, and hyperlinks for additional research and information. Online, 1 hour

J6OP-US008-2 Joint Communication Systems Planners Course Module 2: Introduction to Communications Systems and Services N/S/IP
This module provides basic background knowledge and comprehension of key communications systems and services. The course will prepare individuals assigned as members of a joint task force staff, service component staff, functional component staff, or supporting staffs to more

effectively accomplish their assignments during Joint National Training Capability events, other Joint exercises and real-world operations. The module consists of two lessons on communications systems and services. All content is based on US Joint Doctrine, enhanced with examples, lessons learned, reference citations, and hyperlinks for additional research and information. Online, 1 hour

J6OP-US008-3 Joint Communication Systems Planners Course Module 3: Introduction to Standardized Tactical Entry Point (STEP) Teleport N/S/IP
This module provides basic background knowledge and comprehension of key Standardized Tactical Entry Point (STEP) / Teleport concepts. The course will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during Joint National Training Capability events, other Joint exercises and real-world operations. The module consists of a series of lessons on the concept of Standardized Tactical Entry Point (STEP) Teleports and how a Standardized Tactical Entry Point (STEP) / Teleport Facility Supports a Joint Task Force. All content is based on US Joint Doctrine, enhanced with examples, lessons learned, reference citations, and hyperlinks for additional research and information. Online, 1 hour

J6OP-US008-4 Joint Communication Systems Planners Course Module 4: Introduction to Satellite Communications N/S/IP
This module provides basic background knowledge and comprehension of key Satellite Communications concepts. The module will prepare individuals assigned as members of Service Component, Functional Component, or supporting staffs to more effectively accomplish their assignments during Joint National Training Capability events, other joint exercises, and real-world operations. The module consists of a series of lessons on the concept of Satellite Communications. All content is based on US Joint Doctrine, enhanced with examples, lessons learned, reference citations, and hyperlinks for additional research and information. Online, 1 hour

J6OP-US008-5 Joint Communication Systems Planners Course Module 5: Introduction to Electromagnetic Spectrum Management N/S/IP
This module provides basic background knowledge and comprehension of joint force electromagnetic spectrum use, planning, and management. The course will acquaint individuals with the general duties and supervision of joint force electromagnetic spectrum management personnel, and also with the requirements to prepare the electromagnetic spectrum portion of Annex K. Additionally, this course will provide awareness of the process by which the combatant commands must consider their spectrum requirements, and how to identify and request from the host (foreign) nations the spectrum required for training, exercises, and contingencies.
The module consists of a series of lessons on Joint Task Force (JTF) operations-related joint tasks. All content is based on US Joint Doctrine, enhanced with examples, lessons learned, reference citations, and hyperlinks for additional research and information. Online, 1 hour

J6OP-US013-04 Joint Task Force Fundamentals Course (JTF 101) Module 4: Joint Task Force Information Management N/S
Joint Task Force Information Management module presents the principles, considerations, and processes used to manage information in support of the commander's decision-making process. Topics include commander's critical information requirements (CCIR), requests for information (RFI), battle rhythm, enabling systems, and information assurance necessary to support the mission of a joint task force (JTF). Online, 2 hours

J6OP-US136 Knowledge Management in the Joint Environment Course N/S/IP
The purpose of this course is to provide the background and conceptual framework that will allow Department of Defense (DoD) members to participate and contribute to the knowledge requirements of their organization. In order to maximize the advantages of Net-centric operations, military members must be aware of their roles as knowledge workers and leaders. This course is for all DoD members across all services and will produce active users for the DoD's Global

Information Grid, who are able to take advantage of the information sharing capabilities of networked operations and support both the current and future decision making process.
Online, 2 hours

J6SN-US273 Chemical, Biological, Radiological, Nuclear, And High-Yield Explosives Advanced Learning, Education, and Response Training (CBRNE-ALERT) Course N/S/IP
The purpose of this course is to provide an entry level (Level 1) hybrid course designed to better prepare responders for incidents involving weapons of mass destruction. CBRNE ALERT is an online course that includes three introductory courses: Biology, Chemistry, and Radiology. The biology course describes the characteristics of living organisms and the different levels of biological safety as it applies to microbiology and recombinant DNA laboratories; differentiating between atoms, molecules, elements, and compounds and their importance in biologic systems. The chemistry course focuses on atomic structure; periodic properties, chemical bonding, chemical structure, molecular forces, types of chemical reactions, stoichiometry, chemical kinetics, chemical equilibria, and acids and bases in relation to CBRN identification and analysis. The radiology course focuses on defining basic radiation terms such as alpha, beta, and gamma rays; describing concepts that affect radiation dose such as radioactive activity, radiation exposure, dose equivalence and distinguishing the origin of various sources of radiation emitted from the ground, building materials, water and food, etc. Online, 16 hours

J6ST-MN074 NATO Modeling and Simulation Orientation Course N/S/IP
This course provides a foundation in the basics of modeling and simulation. It also describes the NATO "vision" for simulation and Advanced Distributed Learning, and the way ahead for present and future activities. Online, 4 hours

J7SN-US290 Web Scheduling and Movement (Web SM) Course S
The purpose of this course is to provide students with an overview of the basic scheduling and movement process within the Web Scheduling and Movement (WebSM) software; to include creating, allocating, manifesting, and reviewing carrier information. Online, 1 hour

J7SN-US303 CPX Master Scenario Event List Development Process Course N/S
The purpose of this course is to introduce a standard Master Scenario Event List (MSEL) Development Process for a Command Post Exercise. Other types of exercises especially live or field training exercises use different processes. This process has been developed over several years and has been successful in many exercises from relatively simple to highly complex. The individual Services and Geographic Combatant Commands may use processes adapted to their specific needs that are somewhat different from what is described here, but the principles are the same. Online, 2 hours

J7OP-US364 Introduction to the Rapid Online Content Creation Environment (ROCCE) Course N/IP
The Introduction to the Rapid Online Content Creation Environment (ROCCE) Course describes the functionality of ROCCE, a distributed-learning course creation tool developed by the Joint Knowledge Development and Distribution Capability (JKDDC). This course provides users with an understanding of the functions of various roles in ROCCE. These roles include LCMS Administrator, Content Owner, Content Developer, Media Producer, Template Designer, and Reviewer. The course is intended for anyone responsible for developing distributed learning for the US government using the ROCCE course development tool. Online, 1 hour

J7OP-US379 Response Cell Operations Course N/S/IP
The purpose of this course is to deliver Joint Exercise Control Group (JECG) training to the response cell augmentees earlier in the training cycle. This should allow them to arrive at exercise execution with the basics of response cell operations. This course will explain what a control group does, what it replicates, and how to do it. All course content is based upon US Joint Doctrine and Joint Tactics, Techniques, and Procedures (JTTP).Online, 1 hour

Courses and Information Resources

PACJ7-US001-01 USPACOM Overview Course N
This course will allow you to understand: USPACOM Command Structure; Area of Responsibility; Command Channels; Mission; Operating Environment; Force Structure; Strategic Themes; Exercise Other Engagements; and Functional Capabilities. Online, 2 hours

PACJ7-US001-02 HQ USPACOM Spear Phishing Course N

This course is to educate HQ USPACOM NIPRNET users on the destructive potential of spear Phishing e-mails. Online, 2 hours

PACJ7-US001-03 HQ USPACOM Global Peace Operations Initiative Course N
The course is to provide HQ USPACOM staff members an overview of the mission of the GPOI Program. Online, 2 hours

PACJ7-US001-04 HQ USPACOM Multinational Planning Augmentation Team Course N
The purpose of this course is to provide HQ USPACOM staff members an overview of the mission of the MPAT Program, which includes the Multinational Force Standing Operating Procedures (MNF-SOP). Online, 2 hours

J7ST-US161 Joint Individual Augmentee Training (JIAT) Multinational Forces Iraq (MNF-I) Video Teleconference (VTC) Presentation 24 April 2007 *FOUO* N
This is a recording of a video teleconference. This presentation is only available on the NIPRNET. Online, 1 hour

J7ST-US162 Joint Individual Augmentee Training (JIAT) CJTF-82 Video Teleconference (VTC) Presentation 24 April 2007 *FOUO* N
This is a recording of a video teleconference. This presentation is only available on the NIPRNET. Online, 1 hour

J7ST-US163 Joint Individual Augmentee Training (JIAT) Multinational Forces Iraq (MNF-I) Video Teleconference (VTC) Presentation 24 April 2007 *FOUO* S
This is a classified recording of a video teleconference. This presentation is only available on the SIPRNET. Online, 1 hour

J7ST-US164 Joint Individual Augmentee Training (JIAT) CJTF-82 Video Teleconference (VTC) Presentation 24 April 2007 *FOUO* S
This is a classified recording of a video teleconference. This presentation is only available on the SIPRNET. Online, 1 hour

Linked Courses: These links can be found on the JKO Resources Page

Chemical & Biological Weapons Non-Proliferation Course Linked Course IP
The purpose of this educational module is to provide the user with an understanding of non-proliferation. Non-proliferation strategies encompass a range of issues, from limited arms control measures and counter-proliferation initiatives, to complete disarmament regimes. The study of chemical and biological weapons (CBW) encompasses all of these elements and, as such, provides the focus for the module. Link through JKO IP Portal, accessible at
http://jko.cmil.org/resources
Online, 2 hours

Interactive Doctrine Publications (DOCNET) Courses (30 Courses) Linked Course N
Doctrine Networked Education and Training (DOCNET) courses are a series of Online, multimedia presentations of key Joint Doctrine information. The lessons are designed to enhance Joint Doctrine learning. Each DOCNET course has been drawn directly from doctrine without interpretation and is, therefore, an authoritative source of information for use by the Armed

Courses and Information Resources

Forces of the United States and other Government professionals who require Joint Doctrine knowledge. Link through JKO NIPR Portal, accessible at https://ca.dtic.mil/doctrine/tointer.htm
Online, 30 courses Link to DOCNET

Standing Joint Force Headquarters Joint Enabling Capability Job Aid N
This 18 page flip book was posted to Joint Knowledge Online, for broader distribution. The aid discusses the Commander of U.S. Joint Forces Command's (USJFCOM's) Joint Enabling Capabilities (JECs) to complement service headquarters trained or designated to serve as Joint Task Force (JTF) headquarters. These capabilities provide unique, mission ready support to joint force commanders to aid in the accelerated formation and increased effectiveness of their headquarters. Link through JKO NIPR Portal, accessible at http://jko.jfcom.mil
Online, 1.0 hours

Courses and Information Resources

Communities of Interest Details

CBRN I3P (Installation Protection Program Portal) Community, N
The CBRN I3P (Installation Protection Program Portal) Community of Interest is primarily focused on making the CBRN IPP Non-Material Solution (NMS) available to all Services and installations world-wide via the Internet. The NMS, also known as the Baseline Tier, provides a reference that any installation or CBRN professional can utilize in order to supplement Service, Regional, or Local CBRN responsiveness and goals.

Combat Support Agencies Community, N
This Community provides a forum that provides broad access to peers, expert help, best practices, lessons learned, and innovative ideas.

Energy Security Community, IP
This Community is a forum for discussions focusing on the basics of Energy Security.

Fires Knowledge Network Community, N
This Community is a forum for accessing U. S. Army Fires Center of Excellence.

Future Immersive Training Environment (FITE) Community N
This COI supports collaboration for the Future Immersive Training Environment (FITE) Joint Capability Technology Demonstration (JCTD). FITE JCTD is designed to enhance current training technology capabilities in order to help simulate a more realistic operational environment for training.

Global Lightning - Vigilant Shield 09 Planning Community, S
This Community is a Collaborative Planning Site for multiple combatant command partners to manage the joint event life cycle of these CJCS exercises.

Global Maritime Partnership Program (GMP) Community, IP
The GMP Community provides a forum for the free exchange of unclassified public information and to enhance global maritime awareness/security.

International Security Assistance Force (ISAF) Community, IP
This Community is a collaborative area built for those interested in International Security Assistance Force (ISAF).

International Security Assistance Force (ISAF) Headquarters Community, N
Links to JKO training courses and provides reference materiel related to duty on ISAF HQ staff in Afghanistan.

JKO Gaming Community, N/IP
This Community is a collaborative area for stakeholders interested in the use of game-based learning methodologies and technologies as a part of distributed learning and as a way to enhance individual Joint Warfighter performance.

JKO Manager Community, N/S/IP
This Community is a forum that provides broad access to peers, expert help, best practices, lessons learned, and innovative ideas for Content Editors, Community Managers, and those thinking of starting their own communities.

JKO-S Stakeholders Community, N/S/IP
This Community is a collaborative area for stakeholders interested to share ideas, exchanges information and improve stakeholder communications.

Courses and Information Resources

JNTC Accreditation and Certification Community, N
This site will be a repository of frequently used data pertaining to Joint National Training Capability Program Accreditation and both Site and System Certification. It will provide information resources, news, calendar info, examples, templates, a collaborative conversation space.

Joint Battlespace Interoperability Intelligence Training Council (JBIT) Community, N
The purpose of this Community is to provide information for current and future Joint Interface Control Officers to include descriptions and schedules for the Joint Multi-Tactical Data Link school operated by the FORSCOM Joint Interoperability Division.

Joint Center for International Security Force Assistance (JCISFA) Community, N
This Community provides references and assistance relating to practices and proven TTPs relating to security force assistance (SFA). Information captured, analyzed and published by JCISFA will help advise combatant commands and Military Departments to prepare for and conduct security force assistance missions efficiently.

Joint Command and Control (JC2) Architectures and Capability Assessment Enterprise (JACAE) Community, N
JACAE is a tool suite developed by United States Joint Forces Commands (USJFCOM) Joint Capability Development Directorate (J8) under the Joint Architectures Division (J89) to support architecture development, analyses, capability assessments, and portfolio management.

Joint Enabling Capabilities Command (JECC) Individual Training Community, N
This Community provides single source access for JECC individual training information and material related to USJFCOM JECC as well as access to JKO Learning Management System.

Joint Fires Community, N
This Community is a collaboration site for Army JKDDC Directorate.

Joint Forces Reserve Officer Course (JFROC) Community, N
The purpose of this Community is to provide a central point for all course participants to access required online courses. These courses supplement the classroom content.

Joint Individual Augmentee Training (JIAT) Program Community, S
This Community provides one the ability to explore resources, training, and collaboration for Individual Augmentees.

Joint Information Operations Community, S
This Community is an online resource to support development and sharing of Joint Information Operations products and information, and to stimulate collaboration among the Information Operations Community.
Joint Information Operations Training Community, N
This Community was established as an online resource to support the development and sharing of Joint Information Operations Training and Education products and information, and to stimulate collaboration among the IO Training and Education community.

Joint Intelligence Training (JIT) Community, N
The purpose of this Community is to coordinate and implement the Department's Joint Intelligence Training Program and to ensure that it is aligned with the activities of the Department's Training Transformation (T2) Strategy.

Joint Legal Community, N
This Community is designed to replicate proven practices and share lessons learned; improve access to relevant and authoritative information sources; leverage individual experience and

expertise; and foster an environment of collaboration and knowledge transfer that provide fertile ground business process innovation.

Joint Live Virtual and Constructive Training Environment Forum Community, N
The purpose of this Community is to provide a forum to define, review, and guide the planning, development and integration of existing and future Joint and Service-specific LVC systems.

Joint Medical Community, N
This Community is designed for the medical community to share item of interest such as: scientists creating modeling and simulation technologies including the development of virtual humans, exchanging information regarding specialized portable tablets are enabling training to take place anywhere, anytime, and Sim-Patient "simulated patient" creating scenario-based training to improve pre-hospital, primary, and emergency care by enhancing medical education, training, and practice.

Joint Officer Management Joint Qualification System Community, N
This Community establishes a joint force management community for the joint forces to understand the concept of career-long accumulation of joint experiences, education, and training as advocated in the Department's Strategic Plan for Joint Officer Management (JOM) and Joint Professional Military Education (JPME) and the Chairman of the Joint Chiefs of Staff Vision for Joint Officer Development through a four-level JQS that provides a path for attaining joint qualification through either a traditional joint duty assignment or by accumulating an equivalent level of joint experience, education, and training over the course of a career.

Joint Professional Military Education (JPME) Community, N
This Community is a forum supporting officer and enlisted professional military education (PME) and joint officer professional military education (JPME). The forum also provides a means of exchanging ideas and initiatives supporting the development of a common portal access to joint knowledge.

Joint Provincial Reconstruction Team (PRT) Community, N
This Community is a forum which provides broad access to peers, expert help, best practices, lessons learned, and innovative ideas.

Joint Religious Support Community, N
This Community is intended to provide resources for those who are called to provide Religious Support in a Joint environment, such as Chaplains and Religious Support Personnel. Accordingly, the links and content, while sometimes addressing a single Service point of view, are actually meant to foster a more comprehensive ministry, such as that encountered in a Joint, Interagency, Inter-governmental, Multi-national (JIIM) setting. There are resources here for any type of mission---from Humanitarian Assistance and Disaster Relief (HADR) to Combat Operations to Peacekeeping Operations (PKO) to Civil-Military Operations (CMO).

Joint Senior Enlisted Community, N
This Community welcomes senior noncommissioned officers and petty officers currently serving or preparing to serve in joint or combined operational-level organizations. The community encourages collaboration to enable improved decision-making related to joint issues and to further the quality of leadership among current and future senior enlisted leaders. US Joint Forces Command's (JFCOM's) Joint Center for Operational Analysis (JCOA) sponsors this community as an extension of its Command Senior Enlisted Leader (CSEL) Historical Leadership Perspectives Program. Additionally, JCOA teams with the Joint Forces Staff College (JFSC) to provide a collaboration support environment for those taking the Senior Enlisted Joint Professional Military Education (SE JPME) course.

Courses and Information Resources

Joint Task Force Headquarters (JTF HQ) Training Community, N
The JTF HQ Training Community of Interest provide tailored online training, access to peers, expert help, recommended best practices, lessons learned, and additional staff-specific information for personnel who will be, are, or have been associated with combined, coalition, or JTF HQ staffs. **The following seven are sub-communities within this Community**:

CJTF-South/CJTF-950 HQ Community, N
COMSECONDFLT (C2F) is Joint Task Force Capable Headquarters (JTF HQ) assigned to USJFCOM, to be allocated to USSOUTHCOM for seven specific mission sets, to include humanitarian assistance, stability operations, consequence management, noncombatant evacuation operations (NEO), regional military support and defense, and security cooperation within the SOUTHCOM AOR. CDR USJFCOM certified C2F's readiness to serve as a JTF HQ in October 2007. During FY 08, C2F will sustain its readiness during BLUE ADVANCE 08, JTFEX 08-4 and PANAMAX 08. JTFEX 08-4 is the main sustainment event for C2F JTF HQ for FY 08 with a majority of its training objectives being stressed during the exercise.

This community is designed to provide a central reference for those identified on the CJTF-South Joint Manning Document (JMD), to include required common and functional training, organization, battle rhythm, standard operating procedures, command and control, and a discussion forum. The training and files located in this community will prepare you for your billet responsibilities and duties within the JTF HQ.

The CJTF-HOA Individual Augmentee Training Community, N
This Community provides tailored online training, subject matter expert access, best practices, lessons learned, and peer interaction opportunities for individual augmentees with orders to CJTF-HOA and subordinate headquarters elements in support of Operation Enduring Freedom (OEF). This Community serves as one of the three courses that comprise the JIAT Program, which provides training for individual augmentees with orders to designated USCENTCOM JTF HQs.

The COMUSNAVCENT/ JTF-CR Training Community, N
This community provides USNAVCENT's JTF-HQ Crises Response Online Training Community was developed to train for four specific mission sets -- humanitarian assistance, consequence management, noncombatant evacuation operations (NEO), and oil spill response. USNAVCENT was assigned those missions by USCENTCOM Commander. This community is designed to provide a central reference for those identified on the JTF-CR Joint Manning Document (JMD), to include required common and functional training, organization, battle rhythm, standard operating procedures, command and control, and a discussion forum. The training and files located in this community will prepare you for your billet responsibilities and duties within the JTF HQ.

The Afghanistan JTF HQ Individual Augmentee Training Community, N
This Community provides tailored online training, subject matter expert access, best practices, lessons learned, and peer interaction opportunities for individual augmentees with orders to JTF HQ staffs in Afghanistan in support of Operation Enduring Freedom (OEF), including CJTF-82/Regional Command (RC) East, Combined Security Transition Command Afghanistan (CSTC-A), and subordinate headquarters elements. This Community serves as one of the three courses that comprise the JIAT Program, which provides training for individual augmentees with orders to designated USCENTCOM JTF HQs.

The Afghanistan ISAF Training Community, N
This Community provides tailored online training, subject matter expert access, best practices, lessons learned, and peer-to-peer interaction opportunities for individual augmentees with orders in support of ISAF HQ in Afghanistan.

The Iraq JTF HQ Individual Augmentee Training Community, N
This Community provides tailored online training, subject matter expert access, best practices, lessons learned, and peer interaction opportunities for individual augmentees with orders to JTF HQ staffs in Iraq in support of Operation Iraqi Freedom, including Multinational Force Iraq (MNF-I), Multinational Corps Iraq (MNC-I), Multinational Security Transition Command Iraq (MNSTC-I), and subordinate headquarters elements. This Community serves as one of the three courses that comprise the JIAT Program, which provides training for individual augmentees with orders to designated USCENTCOM JTF HQs.

Joint Training Group Best Practices Community, N
This Community provides a forum to share insights and best practices in areas of interest to the joint warfighter. The US Joint Forces Command (USJFCOM) Joint Warfighting Center (JWFC) Joint Training Group (JTG) delivers joint force training to Combatant Commands and JTF HQs and is located in Suffolk, VA. The JTG supports commanders and staffs of joint force headquarters as they prepare for, plan, and conduct operations. JTG Observer/Trainers analyze and reflect on the challenges and derived solutions from those headquarters. The resulting insights and best practices are incorporated into joint force training and used to inform and shape joint doctrine.

Joint Training Architecture and Technical Standards Community, N
This Community is a forum to collaborate on joint training architectures and standards and to review ongoing and planned projects in the joint training community.

Joint Unmanned Aircraft Systems Center of Excellence Community, N
Joint Unmanned Aircraft System Center of Excellence (JUAS COE) provides support to the Joint Operator and Services by facilitating the development and integration of the Common Unmanned Aircraft System.

Joint Urban Operations (JUO) Community, IP
This Community is established as a forum for broad access to peers, expert help, best practices, lessons learned and ideas for the operational CDR & staff.

Joint Urban Operations Education Program Community, N
This Community is a forum which provides broad access to peers, expert help, best practices, lessons learned, and innovative ideas for the operational commander and staff.

Language and Culture Community, IP
This is a Language and Culture Community for the emerging requirement that a larger DoD population receive basic languages and culture training.

MORS Experimentation Community - Moderated, IP
MORS (Military Operations Research Society) COI provides military, government, and civilian research analysts the opportunity to examine topics pertinent to DoD and other agencies.

Multinational Events Planning Website Community - Moderated, IP
This Community is a forum for Multinational Events Planning.

National Level Exercise NLE 2-08 - Planning Website Community, IP
NLE 2-08 is a tier two national level exercise that encompasses the FEMA 2008 national hurricane preparedness.

Courses and Information Resources

Net-Enabled Command Capability (NECC) Community, N/S
The purpose of this Community is to facilitate upcoming NECC testing of classified information regarding the development of next-generation Command and Control capabilities for the Department of Defense.

Provincial Reconstruction Team (PRT) Community, IP
This Community is a group to support discussion between the Provincial Reconstruction Team (PRT).

Rapid Online Course Creation Environment (ROCCE) Community, N
This COI supports collaboration within the ROCCE community. ROCCE is a web-based collaborative courseware development tool. ROCCE automates the process for collaborative development and review of Advanced Distributed Learning (ADL) compliant content and is a key component of the Joint Content Management Architecture. The ROCCE tool is an add-on to the Joint Learning Management System (Atlas Pro) and turn-key GOTS toolkit for DODI 1322.26 compliance. All completed courses go through the Army Training Requirements and Resource System (ATRRS).

Regional Cooperation 2008 (RC08) Community, IP
This Community is used for planning by the event planners and advanced distributed learning (ADL) for the training audience. Regional Cooperation 2008 is a Chairman, Joint Chiefs of Staff (CJCS) sponsored and United States Central Command (USCENTCOM) conducted regional exercise for the South and Central Asian States. The exercise builds on improved staff planning processes and interoperability achieved during the previous iterations of the Regional Cooperation series of exercises.
The purpose of the Regional Cooperation series of exercises is to strengthen relationships and promote cooperation, coordination and interoperability among participating nations. These exercises have included the nations of Kyrgyzstan, Kazakhstan, Tajikistan, Pakistan and Afghanistan with a focus on developing capabilities and coordination procedures to effectively respond to devastating emergencies in the region, resulting from terrorist attacks or natural disasters.

Regional Security Cooperation Network (RSCN) Community, IP
The RSCN mission is to facilitate the implementation of distributed training, to improve interoperability between US and foreign militaries.

Site Members Community, IP
Default group for all members of this portal.

SJFHQ KM Collaborative Community, N
This Community is intended to enhance operational effectiveness of SJFHQ KM organizations. All COCOM KM participation is welcome.

Small Unit Decision Making (SUDM) Community, N
This COI supports collaboration for the Small Unit Decision Making Irregular Warfare efforts. Irregular warfare against hybrid threats requires a national initiative to focus on the entity decisively engaged most often - the small unit. As part of this effort and in unison with a campaign to enhance ground based simulation in support of small units, the results will provide the framework necessary to make DOTMLPF recommendations that will shape future programmatic decisions, and provide immediate impact for the training and education communities.

UK Ministry of Defence (MoD) Community, IP
This Community is a group to support discussion within the UK Ministry of Defence (MoD) Community.

Courses and Information Resources

US AFRICA Command (AFRICOM) Community, IP
The purpose of this Community is to provide AFRICOM personnel with a single location for information on training.

US Message Text Formatting Web-Based Trainer Community, IP
The purpose of this community is to provide a means to share information about USMTF training tools, information resources, and training courses available to Organizational messaging, Command and Control (C2) messaging, and Tactical messaging system users with a requirement to exchange USMTF messages. Outcomes from leveraging this COI will support the WBT users who will additionally be able to practice drafting GENADMIN, SITREP, COMSPOT, ORDER, ACO, OPREP-3, OPTASK LINK and CASREP messages through the completion of practical exercises.

US Pacific Command (PACOM) Staff Training Community, N
The purpose of this Community is to recommend training and to provide access to mandatory courses such as: USPACOM Overview Course, Information Assurance, and Antiterrorism/Force Protection Course.

US Southern Command (SOUTHCOM) Training Community
The purpose of this community is to provide SOUTHCOM personnel with a single location to identify individual Joint training requirements, from required and recurring, to recommended.

USJFCOM Joint Irregular Warfare Center (JIWC) Community, N
This COI is an umbrella for the JFCOM Future Immersive Training Environment (FITE) Joint Capability Technology Demonstration (JCTD) and SUDM Irregular Warfare efforts.

USNAVCENT Joint Task Forces Headquarters Crisis Response Online Training
Community, N
The purpose of this Community is to train the warfighter for four specific mission sets; humanitarian assistance, consequence management, noncombatant evacuation operations (NEO), and oil spill response.

Virtual Integrated Support for the Information Operations Environment (VisIOn)
Community, N
The purpose of this Community is to facilitate VisIOn information dissemination, capability development, product improvement and more efficient delivery of VisIOn IO capability to the Joint Warfighter.

Appendix

Glossary of Terms

ADL	Advanced Distributed Learning
AKO	Army Knowledge Online
ANSF	Afghanistan National Security Forces
AOR	Area of Responsibility
APOD	Airport Point of Debarkation
ATRRS	Army Training Requirements and Resources System
B2C2WGs	Boards, Bureaus, Centers, Cells, and Working Groups
BMAT	Basic Mission Area Training
BMDS	Ballistic Missile Defense System
C2	Command and Control
C4IFTW	Command, Control, Communications, Computers, and Intelligence For The Warrior
CAC	Command Access Card
CAS	Close Air Support
CAX	Computer-Assisted Exercise
CBRN	Chemical, Biological, Radiological, and Nuclear
CBRNE	Chemical, Biological, Radiological, Nuclear Explosives
CBW	Chemical and Biological Weapons
CCDR	Combatant Commander
CCIR	Commander's Critical Information Requirements
CDR	Commander
CDT	Cooperative Development Team
CENTCOM AOR	United States Central Command Area of Responsibility
CIA	Critical Infrastructure Awareness
CID	Combat Identification
CIIP	Critical Information Infrastructure Protection
CIMIC	Civil Military Co-operation
CIP	Critical Information Protection
CJCS	Chairman, Joint Chiefs of Staff
CJOA	Combined Joint Area of Operations
CJTF	Combined Joint Task Force
CJTF-82	Combined Joint Task Force-82
CJTF-HOA	Combined Joint Task Force-Horn of Africa
CMO	Civil Military Operations
CMOC	Civil Military Operations Center
CoC	Code of Conduct
COCOM	Combatant Command
COE-DAT	Centre of Excellence – Denfence Against Terrorism
COI	Community of Interest
COIs	Communities of Interest
COMCJTFs	Commande Combined Joint Task Force's
COMSECONDFLT	Commander, Second Fleet
CPX	Command Post Exercise
CRC	Crowd and Riot Control
CSEL	Command Senior Enlisted Leader
CSTC-A	Combined Security Transition Command Afghanistan
DEA	Drug Enforcement Administration
DIME	Diplomatic, Information, Military, and Economic
DJC2	Deployable Joint Command and Control
DOCNET	Doctrine Networked Education and Training
DoD	Department of Defense
DODI	Department of Defense Instruction
DoS	Department of State

Appendix

DSCA	Defense Support of Civil Authorities
ECG	Exercise Control Group
EMAC	Emergency Management Assistance Compact
EEO/AEP	Equal Employment Opportunity/Affirmative Employment Program
EEO/AAP	Equal Employment Opportunity/Affirmative Action Plan
EODs	Explosive Ordinance Disposal's
EOF	Escalation Of Force
EP	Electronic Protection
EWS	Electronic Warfare Support
ESDP	European Security and Defence Police
